Doha to see highest tourism growth

SACHIN KUMAR
THE PENNSILNA

Doha is expected to see the highest growth in the world in tourist arrivals. The visitor arrivals in Doha are projected to grow by 104 percent by 2025, making it the fastest growing tourist destination among the major cities worldwide.

The growth is expected to see over 4.51 million visitors in 2025, compared to 2.21 million visitors in 2018. According to travel solution provider, TravelGuru and the World Tourism Organization (UNWTO) report, Doha will be the 6th most visited city in the world in terms of tourism growth.

Doha’s growth is expected to be 75 percent for Beijing, 71 percent for Seoul, 89 percent for Bangkok, 83 percent for Singapore, 89 percent for Kuala Lumpur, and 87 percent for San Francisco.

Offical of the General Director of Traffic told The Peninsula

According to the Department of Statistics for the year 2018, the Doha area was at fifth place in the list of areas witnessing traffic deaths. “As many as eight people per year lose their lives in traffic accidents in the Doha area in 2018 while in the industrial area, 14 deaths occurred due to traffic accidents,” the official said.

The official also said the plan to control accidents in the area also includes intensive awareness campaigns within the community and increased traffic enforcement at schools to educate young people about the dangers of reckless driving in Seilame.

He emphasised the need to cooperate with the relevant organisations such as the Doha Club and Motorway on the identification of appropriate recreation areas.

Regarding the causes of traffic accidents in the area, the official partially blamed drivers who allow their children to ride motorcycles while they are even not driving them. “Also, in addition to organizing unregulated events, traffic accidents do not meet the requirements of security and safety,” the official added.

Among other reasons is the absence of sign boards to caution drivers of dangerous turns and road spots.

New measures to curb traffic accidents in Seilame area

SIDR MOHAMED
THE PENNSILNA

To address the serious issue of traffic accidents, the Seilame area resulting from reckless driving, the local Director of Traffic has taken a number of measures including conducting round-the-clock traffic patrols and stopping people to drive on the roads to make them consistent with traffic requirements.

The measures in the regard have taken to reduce traffic accidents in the Seilame area which also required various requirements for registration of rental shops of motorcycles, dune buggies and other vehicles used for transporting tourists, an official of the General Director of Traffic told The Peninsula.

According to the Department of Statistics for the year 2018, the Seilame area was at fifth place in the list of areas witnessing traffic deaths. “As many as eight people per year lose their lives in traffic accidents in the Seilame area in 2018 while in the industrial area, 14 deaths occurred due to traffic accidents,” the official said.

The official also said the plan to control accidents in the area also includes intensive awareness campaigns within the community and increased traffic enforcement at schools to educate young people about the dangers of reckless driving in Seilame.

He emphasised the need to cooperate with the relevant organisations such as the Doha Club and Motorway on the identification of appropriate recreation areas.

Regarding the causes of traffic accidents in the area, the official partially blamed drivers who allow their children to ride motorcycles while they are even not driving them. “Also, in addition to organizing unregulated events, traffic accidents do not meet the requirements of security and safety,” the official added.

Among other reasons is the absence of sign boards to caution drivers of dangerous turns and road spots.

Commenting on the traffic accidents in Seilame area, a number of social media users noted that the deaths in the Seilame area will not stop only by awareness campaigns as strict laws including doubling of existing fines were necessary to deter reckless drivers from committing the crime.

Also, they suggested it is important to ban photo shoots of dune bashing because such photos and videos encourage young people to imitate others.

The Cabinet recently reviewed the views of some Ministries and government bodies on the recommendations of the Shura Council on traffic accidents in the State of Qatar especially the recommendation to develop the Seilame area to reduce the rate of accidents there.

Qatar Sustainability Summit begins today

HISHAM ALKHASS
THE PENNSILNA

Under the theme ‘Destination Green’, the two-day Qatar Sustainability Summit (QSS) will see discussions of leaders, practitioners, policy makers, researchers and scholars.

According to the agenda of QSS, Minister of Municipality and Environment, HE Eng Abdulrahman bin Jalal Al-Sulaiti, will present the overview followed by speeches by Dr Youssef Eltonom Founding Director of Gulf Organisation for Research and Development (GORD) and Engineer Moheb Meshal Al-Shami, Director of Qatar National Vision 2030.

There will be insightful talks on different important topics including ‘Qatar National Research Fund: Challenges and Opportunities’, ‘Transitioning Energy Systems and Sustainability in Shell’, ‘Ghana’s National Action Plan and Climate Action Initiative’ during the first day of the Summit in Teachers Talk session.

QSS’s grooming efforts in sustainability and climate changes are an important part of the first day’s agenda of QSS in which there will be speeches and presentations on some important topics such as Qatar’s preparations to deliver zero-carbon growth of aviation sector, and scaling sustainability of staple foodstuffs, mitigation and adaptation of climate change initiatives.

The mega event is being launched as the region’s largest sustainability initiatives under the patronage of Prime Minister and Interior Minister H E Sheikh Abdullah bin Nasser bin Khalifa Al Thani, said a statement issued last week by the GORD.

In line with Qatar National Vision 2030, QSS is aimed to ramp up efforts towards sustainable development. With extreme weather event surfaces across the globe, climate change has come under global spotlight as a burning issue. The QSS will look at environmental challenges over the years.

The World Congress of Criminology begins tomorrow in Doha

SIDR MOHAMED
THE PENNSILNA

The 19th World Congress of Criminology is being organised within the framework of the implementation of the outcomes of the Doha Declaration issued at the 13th United Nations Congress on Crime Prevention and Criminal Justice to be held in Japan in 2020.

Brigadier Al Marri pointed out that all participants would benefit from the topics to be discussed related to technology crime prevention and criminal justice policies in the era of globalisation.

Particular emphasis will be on new crimes such as cyber crime, terrorism, and working on the effective ways to prevent and respond to such crimes. He said.

He also stressed that one of the objectives of the Congress is to discuss ways to address the new crimes through methods of combating, legal legislation and criminal justice. Further pointing out that the State of Qatar was also a signatory to the Anti-Terrorism Law which was issued in 2004.
The Speaker of the Shura Council, H E Ahmed bin Abdullah bin Zaid Al Mahmoud, affirmed Qatar’s support for joint work within regional and global systems.

He expressed happiness to participate in the meeting of the Executive Council of the Asian Parliamentary Assembly, and voiced thanks and appreciation to the brotherly Republic of Turkey, its president, parliament and people, and to the President of the Asian Parliamentary Assembly Mustafa Sentop, the Speaker of the Grand National Assembly of Turkey for the kind invitation and good reception as well as for the preparation and organization of this meeting.

H E Ahmed bin Abdullah Al Zaid Al Mahmoud expressed his sincere thanks and appreciation to the President of the Republic of Turkey Recep Tayyip Erdogan, appreciating in this context the role of Turkey in supporting the APA to achieve its objectives in establishing security and stability in the region and the Asian continent.

His Excellency voiced Qatar’s keenness on working towards integration among the Asian countries by expanding and strengthening cooperation among them and establishing partnerships with other regional organizations, unions and blocs to serve the interests of the countries of the region in line with the objectives of Qatar Nation Vision 2030.”

He noted that “the distribution of cash assistance to 75,000 needy families in Gaza is working to achieve Qatar’s keenness on supporting joint action towards the Assembly’s goals, and that our efforts would be crowned with success in supporting just causes in the region, especially the fundamental issue of the Palestinian Cause,” he said.

Payment of cash as assistance to families in Gaza will start today.

The Chairman of Qatar’s Gaza Reconstruction Committee, Ambassador Mohammed Al Emadi, has announced that the committee will start distributing cash assistance to 75,000 needy families in the Gaza Strip today. The distribution is scheduled to continue for several days according to the mechanism of alphabetical order of beneficiaries, in order to avoid the accumulation of citizens on the post-offices.
MoTC unveils Innovation Theatre for QITCOM 2019

THE PENINSULA  27 OCTOBER 2019

The Ministry of Transport and Communications (MoTC) has unveiled the Innovation Theatre for the upcoming Qatar IT Conference and Exhibition (QITCOM 2019).

The Innovation Theatre will witness the best startup presentations, keynote speakers, and discussions about the latest smart solutions driving global digitization.

Under QITCOM 2019 theme ‘Safe, Smart Cities’, the Innovation Theatre will be located at the heart of the Entrepreneurship Zone within the MoTC Zone, where audiences will listen to and learn from upcoming and established entrepreneurs. The Innovation Theatre will host 30 sessions including eight keynotes, nine panels and six pitch sessions comprising of 80 pitches overall. Apart from innovation theatre, the entrepreneurship zone includes four more programs: IdeaCamp, CodeCamp, Make the Deal and Startup Hub.

The first day will be a combination of keynotes, panels and IdeaCamp and CodeCamp pitch sessions, and winners announcements. The second day will focus on IdeaCamp, the third day will include Make the Deal pitches and the last day will witness a special pitch session, followed by the Startup Hub awards ceremony. More than 30 keynote and panel speakers will be discussing Safe, Smart Cities, the Future of Service Delivery, Emerging Technologies and Future Landscapes, Breaking Barriers: Lessons from Women Entrepreneurs, Megatrends and the Three Things that Truly Matter for Investors. Ibrahim Al Mannai, Executive Director of Advisor and Incubation at Qatar Development Bank, Abdullah Al Mannai, Executive Director of Advisor and Incubation at Qatar Development Bank; Sachin Singh, Founder of Q-Tickets and Founder of GDG, Doha and Dr. Tejinder Kumar, Founding Team Member and CEO – Tapult Life and Head of Google Developer Group (GDD).

The event, delivered in collaboration with Qatar IT, is an annual gathering that aims to bring together the stakeholders of technology and innovation, to discuss the emerging technologies and trends.

The Innovation Theatre will host 30 sessions including eight keynotes, nine panels and six pitch sessions comprising of 80 pitches overall. Apart from innovation theatre, the entrepreneurship zone includes four more programs: IdeaCamp, CodeCamp, Make the Deal and Startup Hub.

Hassan Al Thawadi addresses delegates at UN Day

THE PENINSULA  27 OCTOBER 2019

The Secretary-General of the Supreme Committee for Delivery & Legacy, Hassan Al Thawadi, has addressed delegates gathered in New York City for the United Nations Day concert – and used the platform to highlight the parallels between sports and diplomacy, and the opportunities they can create.

The event, delivered in collaboration with the Permanent Mission of the State of Qatar to the United Nations (UN) – with the support of the SC, Brand Qatar, Doha Film Institute and the Government Communications Office – was titled ‘Building Prosperity for All Through Culture, Education, Gender Equality, Sports and Sustainability.’

Taking place each year on October 24 to commemorate the anniversary of the UN Charter, the event has been held each year since 1948. As part of the 2019 celebrations, a concert took place in the General Assembly Hall and featured the Qatar Philharmonic Orchestra and renowned artists Dana Al Fardan, Hala Al Emadi, Fahad Al Khateeb and Shuaa, the Supreme Committee for Delivery and Legacy reported on its official website.

Following the concerts Al Thawadi joined fellow speakers: UN Secretary-General, Antonio Guterres; Deputy Prime Minister and Minister of Foreign Affairs HE Sheikh Mohammed bin Abdulrahman Al Thani in addressing delegates.

“Music is one of the very few vehicles that genuinely transcends borders, languages, and cultures,” he said. “It is inherently inclusive, binding people together, both within and across cultures and borders. Music shares these attributes with sport.”

He continued: “In 2022, Qatar will host the 2022 FIFA World Cup for the first time in the Middle East. The World Cup unites the diverse strands of this planet more than any other. More than half of the planet’s population tuned into watch the final in 2018. It represents a critical moment for our country and our region.”

“The eyes of the world will be on us. Not because of war and conflict. Instead, it’s our chance to showcase our passion for football, our commitment to innovation, the hospitality of our people and to build bridges with the rest of the world – on a people-to-people level. For us, this is much more than 28 days of football.”

Al Thawadi concluded by saying: “On this United Nations Day, it’s important for us to recognise and appreciate the importance of any opportunity that has the power to unite people from different walks of life. In 2022, the World Cup will bring over a million visitors from every continent to Qatar. More than half of the world’s population will dedicate their passion and emotions to the tournament.”

“It’s absolutely imperative that we as global citizens, proponents of international cooperation and strength through diversity and unity, recognise and appreciate the need to ensure those moments aren’t remembered as missed opportunities.”

A-G chairs IAACA meeting in Geneva

The Attorney-General, HE Dr. Ali bin Fethal Al Mami, has chaired the meeting of the Executive Committee of the International Association of Anti-Corruption Authorities (IAACA) in Geneva. The Committee discussed a number of administrative and organisational issues and came up with several resolutions and recommendations. The Committee includes in its membership a number of Attorney-General and Ministers of Justice and heads of anti-corruption bodies and heads of academic institutions from around the world in addition to the United Nations Office on Drugs and Crime (UNODC).
Argentina FM receives credentials of Qatari envoy

Minister of Foreign Affairs of the Republic of Argentina, Jorge Fauri, received a copy of the credentials of Battal bin Meajeb Al Dosari, as Ambassador Extraordinary and Plenipotentiary of the State of Qatar to the Argentine Republic. The Minister of Foreign Affairs of Argentina wished the Ambassador success in his duties and the bilateral relations further development and prosperity.

Fawzia Al Khater visits Qatar Science and Technology School

Assistant Undersecretary for Educational Affairs at the Ministry of Education and Higher Education Fawzia Al Khater has visited Qatar Science and Technology Secondary School to interact with students of the second batch.

She discussed with teachers and administrative staff details of the curriculum, the level of student performance and the ways in which they teach the four subjects in an integrated way by integrating science with technology.

She asked them about the details of the training programmes they had received from the instructors sent by the company that designed the curriculum, and also examined the progress of the projects of students from engineers based on school laboratories.

In her address to the first batch students, Al Khater said that the Ministry of Education and Higher Education has built this school specifically for outstanding Qatari students. It has been equipped with laboratories and the latest educational means specifically to enable students to hone their skills, nurture their creative talents and practice their scientific projects with individual and collective efforts.

The students expressed their satisfaction and pride in the efforts of the school staff. In an atmosphere full of scientific ambition and specialized research, in addition to the school contributions to the development of the spirit of credibility and honesty and instilled in them a love of teamwork, order and diligence and the desire to take responsibility.

She added: “You have reached the stage here at this school, where we wish each student to reach a unique academic and professional experience, where we work for you and your contribution and the care of your excellence and develop creativity and innovation to bring you to the highest standards of education.”

Vodafone to showcase 5G-enabled technology solutions at QITCOM

Vodafone Qatar announced yesterday that it will showcase a range of the most advanced smart technology solutions at the nation’s biggest digital event, Qatar IT Conference and Exhibition (QITCOM), in which it will participate as an ‘Official Sponsor’.

In keeping with the QITCOM theme, ‘Safe, Smart Cities’, Vodafone Qatar will engage with officials and the public in a spacious 1,000 sqm area to demonstrate technologies powered by ultra-fast 5G wireless Internet connectivity: virtual reality, Internet of Things (IoT) solutions, big data analytics, smart technologies for homes and industries, and how Vodafone can enable innovative solutions for a sustainable digitised environment.

Visitors to Vodafone Qatar’s pavilion will experience and interactive demonstrations of 5G-enabled technologies in five zones: Smart Homes; Connected Retail Stores; Smart Industry; Smart City and Gaming.

A dedicated space of 150 sq m will be occupied by international tech start-ups, who will showcase various creative ways in which 5G is unlocking the potential of 5G. With this, Vodafone Qatar aims to facilitate the exchange of ideas and knowledge transfer with local start-ups and businesses.

Vodafone Qatar Chief Executive Officer, Sheikh Abdulla Jassim Al Thani, said: “Qatar is at an exciting stage of its journey to develop smart cities, and we are proud to be an official sponsor of QITCOM as a platform to share our knowledge and highlight new technologies that will further advance that vision.”

“Vodafone Qatar is proud to demonstrate the power of its 5G network to enable innovation for all industries – that bring us closer to smarter, safer cities.”

As part of its ongoing social responsibility programme, Vodafone Qatar will also run four action learning educational activities in the Digital Youth Festival Tumuha Tec, happening on the side-lines of QITCOM. The activities raise awareness and build skills around Internet safety and new technologies for teachers and parents, and will use virtual reality to teach what 5G is.

QITCOM will run from October 29 to November 1 at the Qatar National Convention Centre, with Vodafone Qatar’s pavilion located in Hall 5, stand number H5C6 - H5J6.
CCQ unveils ‘hybrid learning initiative’

The Peninsula

Qatar Chamber’s Health Committee has held a meeting last week headed by QC Board Member and Chairperson of the Committee (Brig. Khalid Al Ahmad) to discuss the issues of concern.

The meeting discussed a range of topics related to the private health sector as well as challenges facing the sector with a view to addressing concerns of appropriate authorities for those solutions.

During the meeting, the committee expressed their thanks to the Permanent Licensing Committee at the Ministry of Public Health for their cooperation and efforts to improve the business environment in the health sector.

In his speech, Brig. Al Ahmad said that the private sector plays a key role in the development process, noting that the Qatar National Vision 2030 has attached to the private sector a special importance as one of the pillars of the national strategy for economic diversification.

He also noted that the private sector investments in the health sector will help mitigate the burden on governmental health institutions, praising the support offered by the state and the facilities provided to the sector.

Al Ahmad praised the newly issued laws that encouraged local and foreign investors to invest in private hospitals, as well as providing lands for investors in new sites.

The next meeting of the Committee will focus on discussing a range of topics that contribute to improving the business environment, including the recruitment of competencies and facilities through the use of enabling procedures.

**Stars of Science unveils top four contestants for Season 11**

In a bid to prove that their products were ready for use testing, the show’s five remaining contestants presented their prototypes in last night’s production proving moment on Season II of Stars of Science. Overcoming challenges in science and innovation, Nuha Abu Youssef, Abdulrahman Saleh Khamis, Husam Sameer, Youssef El Aozouzi and Anfal Al Hamdani demonstrated their knowledge in industrial design to the jury.

The jury had to try Yahia’s Active Lazy Eyelid Sticker, asking her questions about its weight and use, as they took turns wearing the device. The sticker, which stimulates the muscles responsible for closing the eye in patients with afflicted facial muscles and ensures it sticks in union with their unnatural ones, ended up at the highest marks from the jury.

Youssef faced the challenge of being both a mother and an ambitious young woman in the scientific field despite the unique pressures they hold, noted Khalid al-Jumayl. Stars of Science long-standing host. He set a remarkable example for Arab women on how to tackle challenges in science and innovation.

Youssef El Aozouzi and his Flow Modulator Stent were not far behind in the voting, as the independently proposed every concept the jury had about his invention. While export manager Habib Abdulrahman Saleh Khamis for the quality of his Interactive Educational Prayer Carpet and his ability to successfully innovate a religious tool.

Unfortunately, Anfal Al Hamdani and her Dry Lime Auto Extractor fell short of the jury’s expectations. The extractor is designed to extract the carpet of dry citrus fruits by separating it from the pulp while preserving the nutrients and still producing useable material.

Anfal had to leave the competition, but she remained adamant that this was not the end of her innovation journey as she plans to travel to Singapore to continue working on her project and obtain a Master’s degree.

**QC to launch health campaigns for flood victims**

The campaigns, which come after food and shelter assistance distributed recently by Qatar Charity (QC), will benefit more than 178,000 people affected by floods at a total cost of QR3m.

The two health and environmental sanitation campaigns for thousands of flood victims in Sudan with funding from the Fund for Development of Qatar (QFFD). The campaigns, which cover flood and shelter assistance distributed recently by QC, will benefit more than 178,000 people affected by the floods at a total cost of QR3m.

The health campaign will be carried out over a period exceeding two months, providing health services to those affected through six mobile clinics equipped with medicines and first aid. It will cover all flood-hit areas in the Sudan state, benefiting 18,000 people.

The clinic, which will be carried out in coordination with local authorities at an estimated cost of QR3m, aims at contributing to reducing infectious diseases and providing primary medical care and medical supplies available. Also, nutritious meals will be provided for children and infants.

The environmental sanitation campaign will include the provision of assistance to control the spread of water-borne diseases, such as spraying pesticides, purifying and sterilizing drinking water, purchasing pumps providing hygiene items for 4,000 families, and giving mosquitoes-improved bed nets to combat the spread of water-borne diseases.

It is worth mentioning that Qatar Charity, with funding from the Fund for Development of Qatar (QFFD), has recently provided relief and shelter assistance as part of the project to alleviate the suffering of those affected by floods and rains that swept vast areas of Sudan.

The assistance included 13,450 food baskets for 13,450 families, and sheltering aids for 4,000 families, which include blankets, tarps, floor mats and cooking utensils. The assistance included 13,450 food baskets for 13,450 families, and sheltering aids for 4,000 families, which include blankets, tarps, floor mats and cooking utensils.

The relief assistance aimed to rescue and support 110,000 flood victims in Sudan in White Nile, Al Jazirat, and Kasalwa states. Of them, there were 40,500 children, including 8,000 children and 31,000 women.

**Kahramaa to participate in GCC Power 2019 in Oman**

Qatar General Electricity and Water Corporation (Kahramaa) will participate in the 15th conference and the 14th exhibition of GCC Power 2019. The conference, GCC Electric Power conference and exhibition in the gulf region is scheduled to be held from October 22 to 24, 2019 in Muscat Convention Exhibition Centre, Muscat Oman.

Eng. Abdulaziz Al Hammadi, Secretary General of GCC International Council for large Electric Systems (GCC) and Director of the Rationalization and Energy Efficiency Department at Kahramaa, said that the GCC CIGRE will be one of the largest events in the region that are concerned with all aspects related to the generation, transmission and distribution of electric power.

Al-Hammadi delegation led by the President of Qatar General Electricity and Water Corporation (Kahramaa) Eng. Issa bin Hail Al Kuwari will present eight papers during the sessions of the conference Kahramaa is co-chaired by Eng. Essa bin Hail Al Kuwari, Chairman of the Board of Directors, and a high-level delegation where 8 working papers will be presented during the conference sessions.

High-level delegations from Arab countries and specialised companies in the field of power generation, transmission and distribution will also participate to discuss current issues, update the latest developments in the field of electric power, exchange views, in addition to coming up with ideas and decisions that will enhance the level of efficiency in energy supply and competition in the field of electricity. It is expected that the conference will attract over 800 Gulf, regional and international personalities in the field of electricity. Many local and international companies will participate in the exhibition. Al-Hammadi GCC CIGRE aimed at attracting the progress and development of the electric power sector in the GCC countries and raising the efficiency of the electric sector.

Through these conferences, it is expected to conclude some important agreements and agreements that are of benefit to GCC CIGRE, which is its first conference. Gulf Electricity 2001 in Muscat, Oman, the past conferences were a great success in terms of the quality of papers presented and the number of attendances and visitors to the conference and exhibition and the number of exhibitors.

**Blue Salon hosts launch of Italian shoe brand DIS**

Blue Salon has recently hosted the launch of Italian Shoe brand ’DIS’ at a launch ceremony that was attended by a host of fashion enthusiasts as well as the esteemed members of the media. ’DIS’ Italian Shoes, is a winning solution for those who want to stand out and express their personality designing and wearing classic customised shoes for men that are a 190 percent made in Italy. DIS opens unexpected scenarios as you create your own style. No one knows better how to interpret your style and complete your wardrobe with your own choice of classic footwear for men who are ready in tune with what they wear, more than DIS.

**Science Talk at QNL highlights local impact of changes to Earth’s ice caps**

An expert delivers a lecture during the Science Book Forum on significance of the Earth’s ice caps to Qatar and its people.

Qatar National Library’s latest installment of its Science Book Forum took a closer look at the significance of the Earth’s ice caps to Qatar and its people. The talk highlighted the important role of the ice caps in maintaining the stability of tempera- tures and seasons on the planet. It also discussed the different types of icy environments on Earth such as glaciers, ice and ice shelves. The talk also illustrated how ice caps melt and reform, and how such changes have a measurable impact on Qatar.

Anima Khrais, who attended the session said, “Global warming is something that we are always talk about with friends, and it is difficult to understand the actual meaning of such natural phenomena. The lecture today simplified the impact of global warming and how our actions affect the environment.”

“We need to hear from scientists about what makes the world’s temperature change. This was explained very well during the lecture,” said Maryam Al Ghanash, a science teacher, who attended the lecture. “The Science Book Forum is a very useful platform for youth in Qatar to learn about scientific concepts by listening to experts from around the world.”

The library established the Science Book Forum in 2018 to encourage science reading through public forums that discuss influential books and scientific papers on crucial topics of general interest.
Qatar reiterates its support for UN efforts strengthening rule of law

The State of Qatar reiterated its support for the United Nations Program of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law, and commended the valuable results achieved through it. The State of Qatar understands that it will continue to support efforts aiming to strengthen the rule of law and to consolidate and raise the awareness of international law, which is a pillar for maintaining international peace and security and achieving the goals of the United Nations.

The State of Qatar understood that it will continue to support all efforts aiming to strengthen the rule of law and to consolidate and raise the awareness of international law, which is a pillar for maintaining international peace and security and achieving the goals of the United Nations.

One of the highlights of the report was Qatar’s ranking on the global property registration procedure index, where the country has improved its rank from 20th in 2019 to the first place globally in 2020.

Classification and Transparency

The Ministry of Justice continues to modernize and develop the performance of the real estate registration and documentation sector to enhance and improve the services provided to the public, including individuals, companies and investors.

The real estate registration and documentation sector at the Ministry of Justice has witnessed a number of measures aimed at developing and improving the business environment that have contributed in securing this ranking.

The Ministry has also announced that new e-services will be announced soon, which will save time and efforts and bring the ministry closer to the public.

Qatar's reform policies and efforts to improve its trade regulations have enabled it to achieve this remarkable performance. These measures will ensure that Qatar remains a preferred business and financial center for investors and entrepreneurs in the region.

BLOOMBERG

To understand where the impeachment inquiry has gone so far, and where it is likely to go next, you need to keep in mind one key concept: the word "quid pro quo.

A moment to date, House Democrats have built on the original whistleblower’s document by releasing closed-door depositions from those officials in the State Department, Defense Department, and White House who were willing to duly Donald Trump’s order not to testify. By leaking the headlines of their testimony, the Democrats have been able to dominate the news cycle for weeks.

The polls seem to indicate that the public is listening, at least to some extent since the formal inquiry was launched. The percent of people who support impeachment has risen from 39% to 49%. Impeachment supporters now narrowly outnumber impeachment opponents.

Yet Democrats are reaching the end of this phase of quasi-secret investigative deposition. And public hurdles will pose a significant challenge to the Democrats’ momentum.

The first problem the Democrats face is that much of the public - and the media - already knows the basic outlines of the story of a political corruption scheme. That’s because of the basic fact that the Ukraine storyline is fairly simple. Trump pressured the president of Ukraine to investigate a political rival, and he conditioned military aid and a White House visit on a public announcement of such an investigation would take place.

As Nancy Pelosi and other Demo- cratic leaders noted at the beginning of the impeachment inquiry, the opacity of the narrative is a major virtue from their standpoint. The public might not want or will tolerate anything with the complexity of the Robert Mueller investigation.

The downside of the simplicity, however, is that once the story is fixed in the public mind, there is going to be relatively little new about it. Lack of "new news" will slow the impeachment's momentum.

Sure, scandal aficionados can nit-pick over the details of which Ukrainian oligarch was paying into the Swiss bank account of a political consultant or what public-service reporting in the so-called deep-state witnesses, like Ambassador William Taylor, who have testified, take away from the story of Trump. But there might be some pleasure to be taken in observing how remarkably the public is taking all of this in stride. With the loss of momentum, the public hearing will not receive more than a single news cycle.

The one significant twist still remaining in the current phase of deposition taking will come when former national security advisor John Bolton either comes forward or definitively rules himself out.

The arch-hawk is not much liked by Democrats, but neither were the former George W Bush administration officials who were in the mix for Trump. Nevertheless, Bolton is a player, and his presence could inform the alternative Ukraine policy being cooked up by White House acting Chief of Staff Mick Mulvaney and others as a "dog deal" that he wanted no part of. It’s therefore conceivable that Bolton would be able to testify directly about the quid pro quo. It’s also conceivable, however, that some of the knowledge that the Ukrainians have will be subject to executive privilege. Bolton is also likely to take seriously thesequences of any testimony to his public office as a former official of the national security advisor and for the presidency. The result could either dramatically testify or a dramatic refusal to testify.

Once the Bolton issue is resolved, the move to public testimony will be unavoidable. That stage will give way to the second major challenge to the Demo- cratic momentum: the Republican coun- terpunch in the form of a concerted attack on the very real Trump administration.

In other words, the US television cameras are in the room. Republican members of Congress can be expected to use their access to the White House to hammer the president’s alleg- orations in the hearings stage, they will have more twists and turns.

Democrats have an impeachment momentum problem

The Democrats have an uphill battle to overcome Trump’s advantages, and the reality is that Hunter Biden took a position on the Board of Directors of Burisma, a Ukrainian energy company controlled by an oligarch who was under investigation for money-laundering by Ukrainian prosecutors. Joe Biden, as vice president, sought the removal of the investigation’s chief prosecutor. Although Joe Biden’s actions were consistent with US policy – American and IMF officials were frustrated with the government for not taking a stronger stance against cor- ruption, the situation also meant that despite being assigned the Burisma case he had to recuse himself due to the conflict of interest.

The Democrats don’t have a simple response to this, except to insist that the narrative and hope the public won’t be distracted. To maintain control in the public hearings stage, they will have to try to stifle the "greatest hits" strategy, getting the existing witnesses involved in the public for brief and pointed hearings.

Although momentum has been on the side of Democrats so far, many things can still go wrong, and al- tercations will have more twists and turns.

Turkey's military capacity turned the tables in the Syrian conflict

Operation Peace Spring has effectively prevented the PKK/YPG terrorist network from operating in Syria. This achievement is of such importance that Ankara is using it to grow its influence over the region's political landscape. The Turkish Armed Forces (TAF) and the Turkish Armed Forces (TAF) have been working closely with other stakeholders to maintain economic sanctions and impose pressure on the PKK/YPG network. The TAF has also been engaged in joint patrols with the U.S. military to secure the border areas.

The HDP/PKK has been a key player in the Syrian conflict, and its terrorist activities have caused significant problems for Turkey and other countries in the region. The PKK/YPG's terrorist attacks have led to a widespread demand for the military to take action. In response, the PKK/YPG has began to respond to the TAF's military operations, causing some temporary challenges to Turkey's strategy. However, the TAF has been able to maintain control of the region and continue its operations.

The TAF's military operations have been successful in preventing the PKK/YPG from establishing a foothold in the region. The TAF has been able to effectively counter the PKK/YPG's tactics and strategies.

The PKK/YPG has been a significant threat to Turkey and other countries in the region. The TAF has been working to prevent the PKK/YPG from establishing a foothold in the region. The TAF has been able to effectively counter the PKK/YPG's tactics and strategies.

The TAF's military operations have been successful in preventing the PKK/YPG from establishing a foothold in the region. The TAF has been able to effectively counter the PKK/YPG's tactics and strategies.

In conclusion, the TAF's military operations have been successful in preventing the PKK/YPG from establishing a foothold in the region. The TAF has been able to effectively counter the PKK/YPG's tactics and strategies. The TAF's military operations have been successful in preventing the PKK/YPG from establishing a foothold in the region. The TAF has been able to effectively counter the PKK/YPG's tactics and strategies.

Nearly 50 people have died in renewed anti-government protests across Iraq, officials said yesterday, with clashes breaking out as demonstrators turn their fury on government and paramilitary forces.

The death toll from protests this month has climbed to 205, including dozens who were killed in clashes with security forces or by injured protesters. The authorities have since banned rallies.

PARIS — The impoverished West African country of Burkina Faso has deployed troops to the capital, Ouagadougou, to quell protests against the government's handling of the coronavirus pandemic, after days of violent clashes.

Burkina Faso's security forces have repeatedly warned protesters to disperse on Saturday, but thousands of people continued to demonstrate in the capital and other parts of the country, where violence has escalated in recent days.

The government announced on Friday that the capital would be placed under lockdown from Saturday night until Monday morning, with all non-essential businesses closed and public transport suspended.

Violence during Ethiopian protests was ethnically tinged

At least 14 protesters have died in demonstrations across Ethiopia in recent days, with reports of clashes between police and protesters and looting of shops.

Ethiopian police say they have responded to protesters using tear gas and shot dead those who attacked them.

MIDILANKAAL

"The demonstrations have been a step too far for the security forces," said a UN official.

Protests have erupted in recent weeks after a demonstration calling for the resignation of Prime Minister Abiy Ahmed over his handling of the ongoing conflict with Eritrea.

Abiy announced on Saturday that he would step down as prime minister, ending his four-year term, after failing to resolve a 10-year border dispute with Eritrea.

The move came after months of tense diplomatic negotiations and a failed peace initiative in September.

Abiy has been criticized for his handling of the conflict, which has displaced more than 1 million people and has sparked international condemnation.

The UN has called for a peaceful resolution to the conflict and a political process that includes all stakeholders.

One dead in Guinea Bissau rally

An opposition supporter died in a stampede near the presidential palace in Guinea Bissau on Saturday, police said.

The man died as thousands of people were gathering to support the government's bid to change the constitution.

The opposition has condemned the government's actions and called for a peaceful resolution to the crisis.

Search for the brings 50 dead as Iraq protests take new violent turn

Three protesters were killed in the capital Baghdad yesterday, with medics and officials reporting trauma wounds sustained by tear gas canisters lobbed at demonstrators.

Hareth Hasanc wrote on Twitter.

"The Sadrists, especially in their traditional strongholds such as Missan, saw this an opportunity to turn against government militias," he added.

The protests, which started on October 1, have been backed by anti-government groups and have grown in strength in recent days.

They have demanded the resignation of Prime Minister Mustafa al-Kadhimi, who replaced Daesh chief Abu Bakr al-Baghdadi upon his death in a US airstrike. A total of 40 million young people is estimated to be under the age of 35. The sniping rates of irregularities and allegations of corruption sparked the widespread protests on October 1 and the government has since begun to move towards reforms.
India hopes ‘green’ fireworks, light shows dim Diwali impact

India hopes to temper the environmental damage from the festival of light today with fewer, more expensive and less dangerous “green” crackers.

Dhanraj Jain, who has been selling firecrackers in Old Delhi for eight years. He said the “green” crackers, introduced by the Supreme Court ruling in October 2018 to mitigate pollution in Delhi, were more expensive and less popular than conventional ones.

“Business has dropped significantly. Last year, conventional firecrackers and encroachers forced a two-hour limit on selling them in Old Delhi for eight years. There are no traditional crackers, only a few people fly kites,” Jain said.

“Green” firecrackers, indicated by a green logo and a special QR code, emit 30 percent fewer emissions than traditional ones and don’t contain arsenic or lead. They are manufactured in Sikvikast, the manufacturing hub in southeastern India, and are on sale for four months over the festival.

The Supreme Court’s landmark ruling in October 2018 to reduce traditional crackers was a response to the Seasonal Air Pollution Ordinance, which was notified on October 12 in the last Parliament during the budget session. It banned the sale of conventional crackers from October until February to help control air pollution in Delhi, which is typically characterized by chronically hazardous air quality.

The new rules are expected to encourage a lower-pollution Diwali and the environment has been heaved up to temper the environmental impact.

Residents light fireworks outside their homes to celebrate Diwali, the festival of lights, in Raiganj town in the eastern state of West Bengal, yesterday.

Jaish threat: Security tightened in Delhi, other metros alerted

Amid fears of terrorist attacks in India, security agencies have increased security in Delhi and other metros as a preventive measure.

On September 29, the Central Government issued an alert to all states about the possible terrorist attacks in India, particularly in Delhi. The alert was issued after a series of intelligence inputs from various agencies indicated a heightened threat level.

The Central Government also directed all states to take immediate action to prevent any terrorist attacks. The alert was issued in the wake of the recent terrorist attacks in Afghanistan and Pakistan, which have raised concerns about the security situation in India.

Kashmir utilities face militant threat: DGP

The police have received intelligence inputs about the possibility of militant attacks in Kashmir, according to DGP (Director General of Police) Dilbagh Singh.

Singh said the intelligence inputs suggest that militants may use explosives and explosive devices to target infrastructure facilities like water and electricity supplies in the Kashmir Valley. The police have been asked to take all necessary precautions to prevent any terrorist attack.

Singh said the police are working closely with the intelligence agencies and other security forces to prevent any terrorist attack.

In a recent interview, Singh said that the police are taking all necessary precautions to prevent any terrorist attack. He said that the police are working closely with the intelligence agencies and other security forces to prevent any terrorist attack.

Singh said that the police are working closely with the intelligence agencies and other security forces to prevent any terrorist attack. He said that the police are working closely with the intelligence agencies and other security forces to prevent any terrorist attack.

Pakistan, US, China and Russia meet on Afghan peace

In a draft statement released at the end of the meeting in Moscow, China, Russia and Pakistan called on the Taliban to return to the negotiation table with the Taliban and sign an agreement that will set the stage for Afghans on both sides of the protracted conflict to start face-to-face negotiations.

Khan said the government had tried its best to reach an agreement with the opposition. “We gave the option of Paradise Ground in the light of decision of the high court,” he said.

Delays in Afghan vote as time running out

An election crisis is simmering in Afghanistan as preliminary results have not been announced even a month after the landmark polls and as the insurgency rages on.

Kiyani ordered the release of Sharif on medical grounds, his lawyer said.

The lawyer also submitted a pre-arrest with an Indian diplomat over the latest civilian casualties and “unprovoked cease-fire violations” by India.

In a statement released on Friday that negotiation is the only road to peace in Afghanistan, including an early resolution to the US conflict with the Taliban.

A meeting between the Rehbar Committee of the opposition parties of Pakistan and the Indian government’s negotiators has not yielded any result as both sides were not in a position to decide the venue of culmi- nation of the Afghan March being undertaken by Jamarat Ulema Islam and the leadership of Fazlur Rehman.

Taliban held an agreement to attend the China meeting, including former president Hamid Karzai, who has been a strong proponent of direct talks with the Taliban. The participation in earlier sessions of talks with the Taliban held in Moscow.

The Taliban delegation to China will be led by Mullah Abdul Ghafoor Baradar, co-founder of the movement, who spent eight years in a Pakistan jail after he secretly opened peace talks in 2013 with Karzai, who was president at the time. Baradar was arrested in a joint American CIA and Pakistan anti-terrorism agency operation. Neither Pakistan nor the United States were ready for peace talks with the Taliban in 2005. Karzai proposedly said.

The Taliban are the strongest they have been since being ousted in 2001 by a US-led inter- nation holding sway in nearly 50 percent of the country.

In a draft statement released at the end of Friday’s meeting in Moscow, China, Russia and Pakistan called on Washington to return to the negotiation table with the Taliban and sign an agreement that will set the stage for Afghans on both sides of the protracted conflict to start face-to-face nego- tiations on what a post-war Afghanistan would look like.

After nearly a year of direct talks, US envoy Zalmay Khalilzad last but significant peace talks with the Taliban until President Donald Trump declared the talks dead after a series of Taliban attacks killed several people, including a US soldier.

The Taliban are not clear what it would take for Trump to agree to restart negotiations, but the US president has insisted he wants American troops out of Afghanistan and an end to American involvement in what is billed the Islamic Movement of Pakistan.

The representatives, which have bowed to recent rallies to make good on his 2016 campaign promise to end American involvement in what he described as endless wars, including Afghanistan, gener- ated fears that some observers of a surprise tweet suddenly ordering a US withdrawal.

Friday’s statement called for “a meeting of the political leadership, after which some observers say might continue until Trump agrees to new talks.

The 25-point statement called for the formation of a new Afghan government, but the government’s political opponents in Kabul, Afghanistan and the US State group’s affiliate in the country.

Driver charged with murder of 39 in UK truck tragedy

Maurice Robinson, 25, from Northern Ireland, faces "39 counts of conspiracy to traffic people, conspiracy to assist unlawful immigration and money laundering," police said.

British police want help from the international community in Britain and abroad to identify the 39 people found dead in the back of a refrigerated truck on Wednesday, a senior officer said yesterday.

Detective Chief Inspector Martin Fairman said三位一体的 offices had found "very, very few ID papers" among the bodies and hoped to identify the dead through fingerprints, dental records and DNA, as well as photos from friends and relatives.

Police initially said they thought the victims might be Chinese, but Fairman said they do not speculate on the nationality of their victims. "We don't know exactly the nationalities of the victims but we don't suspect it," he said.

Yesterday's rally was called by the ANC and Omnicron Cal- torial, the region's two biggest grassroots pro-independence groups that have organized some of the largest separatist protests in recent years. Marching down the spacious boulevard, demonstrators held banners reading "We won't give in" and "chalking October 18, we won't forgive, we won't forget".

As a helicopter flew overhead, they broke into loud and rebellious, an AFP correspondent said. "I feel really angry," said a 26-year-old computer tech- nician from Tarragona called Marc, who did not give his surname and described the heavy prison sentences handed to nine separatist leaders as "too heavy on the top, insane and shameful".

The violence doesn't suit us white but it means he's normal to dilute workers' rights. "These documents, the dismissed FT report showed, the government's interest to attract investment, create more jobs and increase per capita growth in Greece will average 2.5 percent in 2019-2022, while respecting fiscal pledges to the country's creditors, according to a draft budget released early this month.

Greece hails S&P upgrade as proof of growth

Greek government welcomed its foreign debt rating upgrade by Standard & Poor's proves that our economy is growing even stronger," Prime Minister Kyriakos Mit- tis said in a statement. "Our reform agenda aims to support growth, create jobs, accelerate growth and productivity and improve our economy. And we are fully committed to it." he added.

"We pursue economic growth in Greece which will average 2.5 percent in 2019-2022, fueled mainly by a recovery in domestic demand," S&P Global Ratings said in its statement.
Russian agent back home after US deportation

AP
MOSCOW

The Russian woman convicted in the United States of being a Russian agent returned to Moscow yesterday and declared that she has no desire to go back to America.

Maria Butina was deported on Friday by the United States after a 12-year prison sentence, arriving the next day at the Russian capital’s Sheremetyevo airport carrying a bouquet of flowers, short hair and the shoulder of her father. 

She arrived at her Siberian hometown by train to reunite with her parents and Butina, a gun rights activist, sought to mollify conservative US political groups and promote Russia’s agenda around the time that Donald Trump rose to power. She had been in custody since August 2018.

In brief comments to jour- nalists, a day after arriving on an Aeroflot flight from Moscow, Butina thanked her supporters.

Butina’s legal team, however, told Reuters on Friday that she had been banned from the US.

“I don’t want to go back there in the near future, because if you are a Russian in the United States, you have to worry,” she said.

The former American University graduate pleaded guilty last December to conspiring to act as an unregistered agent for Russia. She admitted that she and a former Russian lawyer worked to leverage contacts in the US Justice Department, in violation of the Foreign Agents Registration Act (FARA).

“The whole world pities it,” she said.

The government could also do something, being he was ‘thankful to our Russian friends for drastically boosting our defense capabilities.’

Serbia remains Russia only ally in the Balkans, despite a pro-NATO orientation, and Western military alliance. Kosovo declared independence from Serbia in 2008.

Serbia’s President, Aleksandar Vucic, said in a statement: “We are talking about fanatic systems.” He said that the radical right-wing and racist views of the perpetrator should not be ignored.

The announcement coincided with a new surge in concern about far-right violence in Germany. 

Butina’s case was highly critical to Russian-American relations and could have threatened to undermine the reset of ties under Russian President Vladimir Putin and US President Donald Trump in 2017.

The government now out- lined its goal of reaching the minimum wage of 750 euros in 2024, a figure that is likely to be well received by them. 

Portugal Prime Minister Antonio Costa has presented a new minimum wage of 25% more than the last, in the last four years of strong economic growth and the deficit cut, won an October 6 election, expanding the government’s representation as the biggest party but still just shy of a majority.

Costa has relied on support of the two far-left parties in parliament – the Communists and Left Bloc – in the last four years of strong economic growth and the deficit cut, won an October 6 election, expanding the government’s representation as the biggest party but still just shy of a majority.

President hopefuls take part in criminal justice forum

The forum is aimed at reforming the criminal justice system after Trump last year signed bipartisan legislation that instituted a number of changes, including easing harsh minimum sentences for non-violent drug offenders.

California officials warned yesterday that “historic and ferocious” winds were set to fan raging wildfires in the north of the state as millions of residents face power cuts.

Lawmakers and staff are holding the first weekend dep-osition of the investigation, after Reckers testimony was post-poned due to memorial events this week for Representative Elijah Cummings, who had been Oversight committee chairman and played a leading role in the impeachment inquiry.

Judge Howell ruling was based on Trump’s assertion that the White House has been openly stonewalling the House’s efforts to get information by sub-poena and by agreement, and the judge strongly disagreed.

The same type of lines was dropped out to protest an award that he served as No. 2 to Barack Obama, the first black US pres-ident, Biden has deep connec-tions to the Democratic and liberal clergy.

Biden leads his closest rival in South Carolina, Warren, by nearly 20 percentage points, according to RealClearPolitics average of recent polls. His rivals have been active on the trail in the state and working to chip away at his apparent lead.

Millions face power cuts as California fires spread

California officials warned yesterday that “historic and ferocious” winds were set to fan raging wildfires in the north of the state as millions of residents face power cuts.

Governor Gavin Newsom declared a state of emergency in the so-called Kincade Fire spread. Pacific Gas & Electric Co. said its engineers were assessing the damage on Tuesday after the fire burned through a neighborhood in Santa Rosa.

The blaze, which is burning out of control, has destroyed about 50 structures and is being fought by a small community of Geyserville and of nearby vineyard owners.

“If this is an event that breaks the norm of extreme wildfires, it is a reflection of the growing threat,” said a National Weather Service official.

“What’s making this event really substantial is the amount of time that these winds are going to remain,” said the National Weather Service.

Hot, intense winds are expected to pick up today and last into Monday.

The state’s largest utility, Pacific Gas & Electric Co. said it had cut off power to 800,000 customers – a precau-tory shutdown that local media said would affect about 2 million people.

The weather event could be the most powerful in California in decades, PG&E said, with dry northeasterly winds forecast to gust up to 120 mph.

People evacuate a house as a fire rages in a distance in Santa Clarita, California, yesterday.
Bolivia President vows run-off election if fraud found in official tally

President Evo Morales called presidential runoff elections a "challenge on which we will not give in."

democracy is not an institution whose credibility is staked on the repetition of elections," he said.

But Morales said he will not accept the results of the election, which was declared valid by officials, if fraud is found.

Morales, who has been in power since 2006, faced criticism after his victory in the first-round election was declared invalid due to irregularities.

The run-off election will take place on April 21, with Morales facing off against right-wing candidate Luis Arce.

Morales, a former coca-grower and social activist, has been re-elected for a fourth consecutive term.

The announcement comes amid growing international pressure on Morales to hold a fair election, with some countries expressing concern over the previous vote.

The United States and European Union have both called for a credible election, while the Organization of American States (OAS) has expressed concern over irregularities.

Morales has repeatedly maintained his victory in the first round, despite widespread allegations of fraud.

The OAS has stated that it will not recognize the results of the run-off if irregularities are found.

Morales has accused his rivals of trying to undermine his government and has threatened to resign if he loses the upcoming election.

He has also accused international election observers of bias and has stated that he will not accept the results of the run-off if they are declared invalid.

Morales has been in power since 2006 and has faced criticism for his handling of the economy and his policies on coca cultivation.

The run-off election is expected to be a tight race, with Arce, a former economy minister, seen as a potential challenger.

Theou also said Morales had not been "escorted" by military officers in the past, as he has maintained in previous elections.

Education partners ExxonMobil Qatar and Qatar University (QU) will host the 8th Qatar University ExxonMobil Teachers Academy in Doha later this month.

The academy, which was first established in 2012 with QU’s National Center for Educational Development and the support of Qatar’s Ministry of Education and Higher Education, provides science and math teachers from Qatar’s government schools with an opportunity to learn new and effective teaching strategies and enhance existing skills.

The academy’s purpose is to ensure that teachers have deep knowledge of their discipline by providing them with access to high-quality training and professional development opportunities. It also helps them inspire students with STEM education so that they have a chance to be inquisitive, innovative, educators and researchers of their generation. Its overall mission is to support national efforts to improve workforce development through building critical skills in the interest of national economic growth. These skills matter fundamentally for Qatar’s economic and social development.

More than 50 teachers will take part in this year’s academy. Around 50 of these teachers are grade 3-6 math and science teachers from Qatar’s government schools; 8 are Teach For Qatar (TFQ) fellows, and the remaining are representatives from Qatar University’s College of Education and Higher Education.

The participating teachers have been carefully selected by the Ministry of Education and Higher Education, Qatar University (QU) and TFQ. They are determined and passionate individuals who are engaged in their profession and connected to their students and communities.

More than 380 teachers from Qatar’s school systems would have taken part in the program by the end of this year’s academy. These teachers are expected to impact over 18,000 students by the end of this year’s academy. Around 40 of these teachers are grade 3-6 math and science teachers from Qatar’s government schools; 8 are Teach For Qatar (TFQ) fellows, and the remaining are representatives from Qatar University’s College of Education and Higher Education.

The academy provides teachers with a platform to advance their skills and knowledge base. The program equips them to challenge and engage students with STEM education so that they have a chance to contribute to a sustainable future. The academy is helping us with this mission and we’re extremely pleased with its outcomes.

“We’re looking forward to co-hosting another edition of the Qatar University ExxonMobil Teachers Academy with our partner ExxonMobil Qatar,” said Ahmed Al-Emadi, Dean of Qatar University’s College of Education. "Great teachers are informed about new developments in their field and try to keep abreast of them to advance their skills and knowledge base. The academy provides teachers with a platform to do all this, as well as the opportunity to access the latest teaching strategies. In turn, they provide students with enriching STEM opportunities, and the promise of successful futures in STEM that can benefit their communities,” he added.

In 2012, we made a commitment to establish the Qatar University ExxonMobil Teachers Academy with Qatar University,” said Abida Bkoulid, President and General Manager for Operations and Marketing for Qatar University ExxonMobil Teachers Academy. “This is what the Qatar University ExxonMobil Teachers Academy is all about, and I have seen firsthand what a successful and effective program it is for teachers and students alike,” said Dr. Abdullah Alta Taeech, Director, National Center for Educational Development at Qatar University.

ExxonMobil Qatar and QU are longstanding partners who have worked closely for over two decades. The partnership has produced several successful educational programs and initiatives, particularly in science, technology, engineering, and math (STEM), and continues to support high quality teaching and learning opportunities in Qatar’s education system.

Over 200 contestants take part in 8th edition of Aspire Torch Staircase Run

With over 200 contestants taking part, Aspire Zone Foundation (AZF) successfully concluded the eighth edition of the Aspire Torch Staircase Run (ATSR) 2019 on Friday.

The event involved participants of all ages and backgrounds in the race categories for children, adults, masters and companies.

British Andrew Jones from Indian Oil was the first place in the Masters – Men’s category for the second consecutive year with a time of 10 minutes and 41 seconds.

Civil Defense team won the race categories, and non-participants in the race categories for children, adults, masters and companies.

For the children’s category, ‘Ooredoo’ sponsored the event, with 11 students taking part.

Chairman of the Organising Committee of the race said: “I congratulate all the winners of the race categories, especially small- and medium-sized enterprises, with one central tool to enable real-time decision-making. Qatar organisations can advance their digital transformation and cloud journeys to meet these challenges and achieve their business objectives. Organisations can automate their operations with WallPost ERP, starting from $124 per user per month.”

“The WallPost ERP software provides businesses with a streamlined way to manage their workforce, enabling them to focus on their core business operations and improving overall productivity.”

In talent management, the WallPost ERP service can automate repetitive tasks, saving valuable time and resources.

The launch of WallPost ERP, powered by Ooredoo, builds on the 2018 partnership between Ooredoo, Moore Stephens, and Smart Management IT Solutions to develop WallPost ERP.

Business customers can leverage the Ooredoo Advantage, making Doredo: Best for Business, thanks to its breadth and depth of talent, best fixed and mobile networks, broad portfolio of ICT services and solutions, and trusted partner for 60 years.

Ooredoo announced yesterday that the industry-leading WallPost enterprise resource planning (ERP) solution is now available for all businesses in Qatar, supporting new levels of digital transformation.

“By adding WallPost ERP to our portfolio of business solutions, we are empowering business customers with digital transformation, especially small- and medium-sized businesses, with one central tool to enable real-time decision-making. Our organisations can advance their digital transformation and cloud journeys to meet these challenges and achieve their business objectives.”

“The WallPost ERP service modules include the Portal for real-time dashboards, Finance for accounting and financial planning, HR for planning and managing the customer lifecycle. Project Performance for project or portfolio management of individual customers. Ooredoo launches ‘WallPost ERP’ for SMEs to run in real-time. Ooredoo ‘Best for Business’, thanks to its breadth and depth of talent, best fixed and mobile networks, broad portfolio of ICT services and solutions, and trusted partner for 60 years.”

Winners of the race were honoured by a cheque presented at the event, along with certificates and medals.
