HMC’s satellite facility offers emergency care in industrial area

FAEZENA SALEEM
THE PENINSULA
Hamad Medical Corporation’s (HMC) new satellite facility in the industrial area is already delivering safe and effective care to people who work and live in the area.

With the opening of Industrial Area Satellite Emergency Department (IASED), HMC has expanded its network of emergency care and would reduce the burden on tertiary care centers such as the Hamad General Hospital, said Dr. Allah Mohammad Arad, Deputy Chairman, Corporate Emergency Department, HMC.

Minor cases such as small injuries, mild respiratory problems, mild abdominal pain and other mild conditions are being treated at the IASED.

This is the first of its kind facility to open in the country and in will be able to process 200 patients per day and it is expected to increase between 300 and 500 once the facility is fully operational.

IASED has facilities, including 22 patient care spaces to see minor cases, two fully equipped rooms to stabilize acute patients before shifting to tertiary hospital, and three beds for patients who need observation.

The IASED saw the soft opening yesterday on 3 September and Saad Al Kaabi, HMC’s System Wide Incident Command Centre (SWICC) Committee Chair with several other officials toured the IASED and learnt about its services and facilities.

Initially IASED sees around 100 patients per day and it is expected to increase between 300 and 500 once the facility is fully operational. It also has separate patient pathway and dedicated area for COVID-19 suspected patients and a swelling centre is also available near to the IASED.

“The new IASED is expected to be a mission in line with HMC’s mission to deliver the most effective and most compassionate care to every one of our patients,” said Dr. Warda Alkaabi, HMC’s Chief Consultant of Emergency Medicine.

“Upon arrival and regis- tration, patients undergo a brief triage to help determine the nature and severity of their illness. They will then get triaged by a more senior physician. Then they will be referred to and managed at IASED or the tertiary tertiary hospital for further management.” said Dr. Warda.

Ministry of Public Health (MoPH) reports 421 new recoveries

The Ministry of Public Health (MoPH) yesterday announced 421 new confirmed cases of COVID-19 while 429 new patients were reported from the virus bringing the total number of infected cases in Qatar to 30,259.

All new patients are said to be in isolation and are receiving necessary healthcare according to their health status.

The Ministry said that measures in place to combat the COVID-19 virus in Qatar have succeeded in flattening the curve and limiting the spread of the virus and the number of new daily cases and hospital admissions is continuously declining each week.

It said that Qatar’s proactive and extensive testing of sus-pected cases has enabled the country to identify a high number of positive cases in the community.

It also said that Qatar has one of the lowest COVID-19 death rates in the world which is a result of very high-quality care provided through the public healthcare sector, especially for COVID-19 patients. Qatar’s young population, proactive testing to identify cases early, expanding hospital capacity, ensuring all patients receive the medical care they need, pro- testing the elderly and those with chronic diseases.

Even though restrictions are being lifted, and numbers are declining, this does not mean we can relax. The COVID-19 pandemic is far from finished in Qatar - every day is a new fight and working in the area to access appropriate care from specialists.” Dr. Althaf told The Peninsula.
Amir attends IOC session

The State of Qatar stressed the importance of the conditions in light of the outbreak of Covid-19 (COVID-19) through a rapid and impromptu intervention, which itself united against a common threat, which finds itself united against a common threat, which is COVID-19, calling for turning the challenges of this pandemic into opportunities through commitment and solidarity with the most vulnerable groups in the societies, which are prisoners, as well as through the promotion of joint action to ensure an equitable distribution of support to prisoners, with the aim of sparking construction in the field of the promotion and protection of human rights, particularly during the global pandemic caused by the COVID-19.

The second webinar in the QGBI Talks for Early Career Researchers series will be held on July 22, will see Dr. Nasser H. Zawia, professor and former Dean of the Graduate School at the Qatar University, discuss the basic elements of the research proposal development based on the National Institutes of Health (NIH) format.

H E Sultan bin Saalim Al Mansouri, the QGBI vice president of research at the QGBI and Vice President of Research at HEC, and Vice President of Research at HEC, led the first webinar series on Developing a Plan for Scientific Research Development. During the discussion, the QGBI delivered a special advice to the students on how to develop a research plan in today’s extremely uncertain and highly competitive world, particularly during the global pandemic caused by the COVID-19.

Qatar calls for removal of Sudan from terror list

Abd Allah Al Sawsawi provided the reading for Sudanese public opinion by the government of Sudan, which called for the unconditional release of ten thousand prisoners, as well as through the promotion of joint action to ensure an equitable distribution of support to prisoners, with the aim of sparking construction in the field of the promotion and protection of human rights, particularly during the global pandemic caused by the COVID-19.

The Fire Station to hold traditional puppetry workshop today

THE PENINSULA

Dr. Hassan Ali Kassem, Chief Medical Officer of Qatar Red Crescent Society (QRCS), Medical Affairs Division, discussed the importance of community engagement as “showing extraordinary efforts in balancing their humanitarian and professional responsibilities.”

According to him, they were the first to work with other government and non-government organisations to battle the coronavirus (COVID-19). “Qatar is always driven by impressive results that we produced with the help of the government and partners,” he added.

The Medical Affairs Division is the part responsible for operationalising the health plan and the treatment for expatriate workers, the local community, and Qataris.

“Under a contract with the Ministry of Public Health, we work with Hamad Medical Corporation (HMC) to operate health centres in different parts of the country to provide emergency and ambulances services for workers,” he said.

Since the outbreak, there were more than 1,000 cases of COVID-19, and the QRCS, MOPH HMC, and Primary Health Care Corporation (PHCC) had a special department was established to deal with those who are in self-isolation at home or in quarantine. The department has provided treatment for respiratory illness who show symptoms similar to those of COVID-19.

It is a separate building with its own entrance, clinic, pharmacy, and capacity to conduct tests. The person is registered with an identification number and is allowed to resume his daily activities. Meanwhile, our website -https://www.qrsc.org.qa/ - is a platform where ideas can be shared and we can inspire each other through our work.

It has also hosted dozens of live coffee teleconferences and webinars in the field of culture and the arts. The Fire Station plays a strong role in the future of the country’s art scene being home to the artists in Residence Program which is a highlight of Qatar Museums’ initiatives, aimed at creating a new generation of Qataris who can help create and attract events and activities in Qatar. Since its establishment, the programme has nurtured dozens of artists in various fields.

The Fire Station also organises other events for both locals and non-locals and New York and Paris in New Individual and international curators represent the Fire Station as the integral part of the Fire Station.

Dr. Aysha Al Mudahka

As Al Mudahka explains, the emphasis on developing and promoting the Arabic language through all avenues across its ecosystem.

“The Fire Station to hold traditional puppetry workshop today

Dr. Aysha Al Mudahka, a multidisciplinary artist and writer who is in residence at the Fire Station, the Qatar foundation’s programme, aimed to explore the human condition through the puppetry art form and the various mythological themes. The workshop, led by Sumayya Nazeer, aimed to explore the human condition through the puppetry art form and the various mythological themes. The workshop, led by Sumayya Nazeer, Headmistress of the Junior Section of MES Indian, introduced the workshop titled, “The Puppet Theatre: A Marathon to the Unknown” with Sumayya Nazeer and Young Actors.

During the duration period, two puppet workshops were conducted in residential areas and community centres to introduce the theatre for all ages in different locations in the city. A total of 30 participants from Grades IV expressed their views on the various effects of lockdown imposed at the time. The workshop was led by the Chief Guest of the Project, Sumayya Nazeer, Principal of the Indian School of Qatar.

The workshop included the participation of the Indian School of Qatar, which introduced them to making use of the mud masks by turning it into a productive and meaningful activity.

The workshop scheduled today will introduce the participants to “wayang” puppets used in traditional form of puppet theatre play, tracing its origins to Javanese culture wherein a dramatic story is told through shadows thrown by puppets and sometimes combined with human characters. The workshop included the participation of the Indian School of Qatar, which introduced them to making use of the mud masks by turning it into a productive and meaningful activity.

Hagia Sophia belongs to Turkish nation: Minister

ANATOLIA — GENOA

Hagia Sophia belongs to the Turkish nation and not on less than that has a right to say anything about it, the Turkish defense minister said yesterday.

Turkey's deputy foreign minister, Cemyl Atilla, said in a statement by the government spokesman of the Turkish defense ministry.

Hagia Sophia is a Byzantine basilica which was converted into a mosque by the Ottoman Turks after the fall of Constantinople in 1453.

A Turkish flag flies as the media shoots footage in front of the Hagia Sophia in Istanbul, Turkey, yesterday.

"Hagia Sophia belongs to the State of the Republic of Turkey and the Turkish nation. So the one who can have a say about it is the State of Republic of Turkey and the Turkish nation," Defense Minister Hulusi Akar said.

A man waves a Turkish flag as he makes the nationalist grey wolf sign in front of the Hagia Sophia in Istanbul, Turkey, yesterday.

"Afan was a Turkish flag as he makes the nationalist grey wolf sign in front of the Hagia Sophia in Istanbul, Turkey, yesterday.

A UN human rights expert said yesterday Iran should immediately halt what amounts to "collective punishment" of Palestinian people, which is "most severe and scarring," in continuing closures of Gaza.

"The extent of the dehumanizing impact of Israel's collective punishment is most strikingly seen in its ongoing 15-year-old closure of Gaza, which now suffers from a completely collapsed economy, devastated infrastructures, and a heavily rationed and deteriorating social service system," Mitchell said.

The special rapporteur on the situation of human rights in the Palestinian territories occupied by Israel, Nils Melzer, said practices entail serious violations against Palestinians, including the right to life, freedom from torture, the right to an adequate shelter, and an adequate means of subsistence.

"Israel's actions and policies since the 1967 war have caused untold suffering to the Palestinian people, which is compounded by the illegal occupation of the territories occupied since 1967, collective punishments, and economic sanctions," Melzer said.

Gaza closure is "collective punishment": UN expert

A UN human rights expert said yesterday that Israel should immediately halt what amounts to "collective punishment" of Palestinian people, which is "most severe and scarring," in continuing closures of Gaza.

"The extent of the dehumanizing impact of Israel's collective punishment is most strikingly seen in its ongoing 15-year-old closure of Gaza, which now suffers from a completely collapsed economy, devastated infrastructures, and a heavily rationed and deteriorating social service system," Mitchell said.

The special rapporteur on the situation of human rights in the Palestinian territories occupied by Israel, Nils Melzer, said that practices entail serious violations against Palestinians, including the right to life, freedom from torture, the right to an adequate shelter, and an adequate means of subsistence.

"Israel's actions and policies since the 1967 war have caused untold suffering to the Palestinian people, which is compounded by the illegal occupation of the territories occupied since 1967, collective punishments, and economic sanctions," Melzer said.

The Vatican has rejected a plan by Israel to elevate a small Jerusalem church to the status of a basilica, saying it would violate international law.

"These practices entail serious violations against Palestinians, including the right to life, freedom from torture, the right to an adequate shelter, and an adequate means of subsistence," Melzer said.

"Israel's actions and policies since the 1967 war have caused untold suffering to the Palestinian people, which is compounded by the illegal occupation of the territories occupied since 1967, collective punishments, and economic sanctions," Melzer said.

Algeria plans law to protect medics as attacks, virus cases rise

Algeria plans a law to protect medics as attacks, virus cases rise.

Algeria's healthcare workers have been met with violent attacks in recent weeks. President Abdelmadjid Tebboune said on Thursday that the attacks were due to the population failing to respect and “relax” the measures put in place to fight the pandemic. The government also slammed “the attacks by the media” that it described as “acts” seeking to discredit public authorities.

South Africa's main opposition party DA has called for a new urgent court challenge against the government over the scrapping of the troubled South African Airways (SAA) carrier.

The Democratic Alliance (DA) party said it had ‘filed an urgent interdict application’ at the High Court in Pretoria to stop the government from ending its multi-billion rand bailout of the once-ailing state-owned airline.

A government-appointed commission, the Delhi Minorities Commission (DMC) said Muslim spreaders were selectively targeted during the protests in New Delhi in February and March.

In all, 11 mosques, five madrasas, three schools and a graveyard were vandalised and 12 persons from six religious groups from the state had faced law, said DMC chairman Mittal.

Recommendations made in the report include protection of minority rights are not discriminatory and favour Indians, and the commission made recommendations on strengthening of laws and procedures on law enforcement.

In February, violence in New Delhi had left hundreds killed and thousands injured.

Pakistan's government has validated the licences of 166 of 177 Pakistani pilots working in different countries, as they have been cleared through the Pakistan International Airlines' (PIA) civil aviation authority and remain in the pilot's licence database, a spokesperson for Pakistan's Civil Aviation Authority (CAA) said on Friday.

"The revelation prompted the foreign aviation safety agency to hail Pakistan's national airline for flying into Europe for six months. It also carried a guarantee that the ground pilot working in Europe is the same," said the spokesperson.

At the time of the EU's inspection, PIA was not flying to Europe because of the pandemic, but now it has started flying to Rome.

"The government of the People's Republic of China has been in talks with the Pakistan government to take back its pilots who have been out of their countries since last year due to the lockdowns in Europe. Several Pakistani pilots working for Chinese companies have reached China via the UK and France," said the spokesperson.

"The Pakistan government has validated their licenses and the pilots have also been in touch with their employers and are ready to leave for work. The pilots have been cleared by the Civil Aviation Authority of Pakistan and the Pakistan International Airlines, which are their employers. The pilots are all set to fly in the near future and will be deployed to work in European destinations," the spokesperson said in a statement.

Pakistan PM urges ‘simplicity’ to slow virus over Eid Al Adha

AP — NEW DELHI

Pakistan should celebrate the upcoming Eid Al-Adha festival with “simplicity” and observe a Covid-19 containment protocol to prevent a spike in new coronavirus cases, Prime Minister Imran Khan said yesterday.

"The Pakistan government has observed social distancing guidelines and restrictions during the last religious holiday, the end of Ramadan in May — helping fuel a substan- tial upsurge in COVID-19 cases across Pakistan," he said.

"The Eid festival of animal sacrifice comes at the end of the month and lasts for five days. As such, people expect a rush of people going from one city to the other to meet their families from cities to observe the festival," Khan said.

"According to official tallies, around 200,000 people in Pakistan have tested positive for the Covid-19 virus and more than 5,470 deaths have been recorded so far. This has been seen the rate of new infections digital numbers. So far, the health and medical experts have said this is the government’s second highest in terms of death toll,” Khan said during his news conference.

**Biden facing pressure as running mate search enters final phase**

President Joe Biden is facing growing pressure to narrow his vice presidential search as the number of top candidates continues to shrink.

Biden and his team have been meeting with a lineup of potential running mates, although the presumptive Democratic nominee is yet to name a specific finalist.

The selection of the vice presidential candidate is critical for Biden as he looks to solidify his message and appeal to voters in the upcoming election.

With the search entering its final stages, Biden is expected to make a decision soon, potentially in the coming days or weeks.

The vice presidential choice will be a key factor in determining the outcome of the election, as it will help to balance the ticket and appeal to different demographics.

Biden's decision will also have implications for the future of the Democratic Party and the course of American politics for the next four years.

**Military deployed in California as COVID-19 cases surge**

The US military has been called in to help fight the coronavirus outbreak in California, where officials are concerned about a possible spike in cases.

The deployment of military personnel is part of an effort to provide additional aid to overwhelmed hospitals and to help with contact tracing.

The deployment of military personnel highlights the severity of the situation in California and the need for urgent action to control the spread of the virus.

The surge in cases in California comes as the country as a whole is seeing a more widespread increase in infections, with infections rising in many parts of the country.

The deployment of military personnel is a significant step in the battle against the pandemic, and it is expected to help ease the burden on healthcare systems across the state.

**Venezuelan parliamentary polls ‘legitimate’: Argentina**

Argentina has recognized the results of Venezuela’s parliamentary elections, which were held on December 6.

The elections were boycotted by the opposition, who alleged that the vote was rigged and unfair.

Argentina’s recognition of the results of the elections is seen as a blow to the opposition, who have been seeking international support for their democratic cause.

Argentina has been a long-time supporter of democracy and human rights, and its recognition of the results is seen as a significant victory for the Venezuelan government.

The recognition of the results is also seen as a vindication of Venezuela’s President Nicolás Maduro, who had been under pressure from the opposition and from some in the international community.

**Pentagon issues action on factsheet on Confederate flag at base**

The US Department of Defense has issued a policy statement on the Confederate flag, which is flown at several military bases.

The statement, which was released on July 16, prohibits the display of the flag on military installations and in official government buildings.

The policy follows the recent decision by the NASCAR Sprint Cup Series to ban the display of the Confederate flag at its events.

The statement also states that the Confederate flag is a symbol of hate and racism, and that it is not appropriate to display it on military bases.

The policy is seen as a positive step in the ongoing effort to address the legacy of the Confederacy and its symbols, which have been a source of controversy for many years.

**Recent spike in Canadian virus cases worrying Medical Officer**

Dr. Deena Hinshaw, the province’s chief medical officer, said the recent increase in cases is “very concerning.”

Hinshaw said the province has seen a “very unusual spike” in cases, with a daily increase of 50 in the last two days.

The province has also seen a rise in hospitalizations, with 30 people currently in intensive care.

Hinshaw urged Albertans to continue following public health guidelines and to take precautions to prevent the spread of the virus.

The recent spike in cases has led to increased concerns about a potential second wave of the virus, and Hinshaw said the province is monitoring the situation closely.

**Coronavirus infections in Brazil no longer growing exponentially but have reached a plateau**

The number of coronavirus infections in Brazil has reached a plateau, according to data from the country’s health ministry.

The ministry said that the number of new infections has stopped growing exponentially and has reached a plateau.

The ministry also said that the number of new infections has started to decrease in some states.

However, the ministry stressed that the situation remains critical, and that the country needs to continue implementing measures to control the spread of the virus.

**Venezuelan opposition’s chief calls for military action against government**

The head of Venezuela’s opposition, Antonio Ledezma, has called for military action against the government of President Nicolás Maduro.

Ledezma, who is based in Spain, said that the situation in Venezuela is “catastrophic” and that the military has a duty to protect the constitution.

Ledezma’s call comes as tensions between the opposition and the government have escalated, with both sides accusing each other of tyranny and violence.

**Military deployed in California as COVID-19 cases surge**

The deployment of military personnel to California is part of a broader effort by the US government to address the pandemic, which has already claimed more than 180,000 lives in the country.

The deployment of military personnel is seen as a critical step in the battle against the pandemic, and it is expected to help ease the burden on healthcare systems across the state.

The deployment of military personnel is also seen as a positive step in the ongoing effort to address the legacy of the Confederacy and its symbols, which have been a source of controversy for many years.
