The QIA plans to open office in India’s Envoy.

Impeachment trial: Senate votes to acquit Trump

A number of international and regional organizations have expressed their opposition to the US Senate's acquittal of President Donald Trump on Saturday, with more than 150 countries condemning the move.

A report from the USFix News Agency said that the Trump administration has been accused of granting special deals to friends and associates at the expense of US taxpayers.

In a tweet, Trump said: "I am the most innocent President in American history. This is a disgrace. This is an embarrassment to our great country."

The Senate acquitted Trump on Saturday, ending a trial that was widely seen as a test of the US political system and its capacity to hold a president accountable for misconduct.

Minister of Culture and Sports, HE Salah bin Ghanem Al Ali, crowned the winners of the Amir’s Sword Endurance Race held at the Marathon village in Qatar.

Rider Jassim Rashid Al Attiyah came in first place and won the Amir’s Sword Endurance Race trophy.

The race was held over a distance of 100km with four stages, the first for 40km, the second for 30km, and the fourth for 20km.

November 11  to all outpatient consultation.

"Similar to the arrangement in the Amir’s Sword Endurance Race, the number of COVID-19 cases had increased throughout the pandemic."

"This is a crucial time for the country as a whole. We are facing a new wave of COVID-19 cases, and it is essential to strengthen our public health measures."

"Several measures have been put in place to prevent the spread of COVID-19, including mask-wearing, social distancing, and mass testing.

"We urge all citizens and residents of Qatar to continue to follow the guidelines and take necessary precautions to protect themselves and others."

"Every patient who has an appointment at any of the HMC hospitals will be contacted and their appointment will be rescheduled with the attending physician."

"The decision to arrange a face-to-face appointment if needed and patient will be informed by the clinic."

Deputy Prime Minister and Minister of Foreign Affairs, HE Sheikh Sheikh Abdullah bin Mohammad Al Thani, said: "We are continuing under which H H the Amir of Qatar and Honourable Prime Minister of India strengthened further this great partnership.

The visit of Minister of External Affairs of India, Dr. Singh in November 2020 added momentum to very close partnership between the two countries."

"The talks also touched on various areas of bilateral cooperation including trade, investment, energy, cultural, people to people contact and education cooperation. They also looked for exploring new areas to enhance the cooperation further."

Indian Ambassador Dr. Deepak Mittal during the interview.

The Ambulatory Care Center (ACC) of the Hamad Medical Corporation (HMC) in Doha has opened its new International ICU service, which is the first of its kind in the country. The new service, established by ACC to cater to the growing demand for critical care services, will provide quality care to critically ill patients.

ACC is in the first of its kind, which will be the first International ICU in Qatar to have earned the Gold Certification for Excellence in Person-Centered Care from Planetree, an international nonprofit organisation focusing on person-centered care.

The medical team at Ambulatory Care Center’s ICU.

ACC, established recently, is a corporate decision was taken to establish an expanded facility to cater for the growing demand for critical care services.

Dr. Khalid Mohammed Al Jalham, Senior Consultant Intensivist and Section Head of the Surgical Intensive Care Unit at ACC, said: "The new ICU includes 10 separate patient rooms; each is fully furnished to provide comfort to patients and their families during the height of the COVID-19 pandemic. This was particularly helpful when, during the months of February and March respectively, we provided care for a patient with COVID-19 for several weeks until they recovered sufficiently to be moved to the general ward." ACC was the ideal choice for this unit as it is centrally located within Doha and other facilities, several of which were located nearby, which means easier access for critical patients.

The new ICU is established in ACC in July 2020, which was opened in ACC on 24 July 2020. This was particularly helpful when, during the months of February and March respectively, we provided care for a patient with COVID-19 for several weeks until they recovered sufficiently to be moved to the general ward. ACC was the ideal choice for this unit as it is centrally located within Doha and other facilities, several of which were located nearby, which means easier access for critical patients.

The book is published by the Qatar University Press and authored by Mr. Abdullah Al Rayeb, Professor of Law at Qatar University College of Law.

The book includes three chapters and four appendices, which exemplifies the general theory of sports law in terms of its definition, characteristics, principles, sources of its rules, and its relationship to other branches of law. It also sheds light on the general framework of sports law at the international level.

The chapter focuses on sports legislation in the State of Qatar, the bodies in charge of managing sports at the country, and the role of the Ministry of Culture and Sport in the initiation projects that Qatar has taken in line with its sports laws and their legal dimensions.

The chapter deals with sports law, a wide-ranging program of learning and has always been an essential part of the curriculum with its importance in sports legislation, institutions, and policies important in sports law. The chapter deals with all the major issues of sports legislation, institutions, and policies important in sports law. The chapter deals with sports contracts, sports sponsorship, contracts for the transmission and broadcast of sporting events, insurance, human rights, animal rights, environmental protection in the sport field, stimulants, drug tests, sports administration, and others.

The book is divided into chapters and appendices, and the chapters cover all the major issues of sports law, which are important in sports legislation, institutions, and policies important in sports law. The book deals with the importance of sports law, which is further highlighted due to its importance in sports legislation, institutions, and policies important in sports law.

The book’s importance is further highlighted due to its importance in sports legislation, institutions, and policies important in sports law.

Qatar University recently published a book on ‘Sports Law’.

Iran faces virus surge in southwest, recovered vaccine batch

Iran declared 10 southwestern communities as virus management zones on Sunday, as the Middle East's second-most affected country battles a surge in COVID-19 "red" zones as a consequence of the coronavirus pandemic. And the Iranian national TV, the IRIB, reported the list of the zones.

But Allah, capital of olive-rich Khuzestan province and other nearby cities and towns were declared as "red" zones, where people must wear masks in public and at home, avoid gatherings, stay in their homes after 7 p.m., and close all non-essential businesses to close.

The government said its measures were taken due to a decrease in the observance of health protection measures in the province, which had a significant increase in the number of deaths and patients compared to the previous weeks. The government also said the number of those infected with the virus had increased significantly in the past week.

President Hassan Rouhani claimed that the new measures would help combat the virus outbreak in the southwest and throughout the country. He also said the government would provide all necessary support to help people during the period.

Rouhani added, "We are facing a very difficult situation, so we must be more careful. We must follow all health guidelines, wear masks, wash our hands regularly, and avoid gatherings. We must not underestimate the virus and be responsible for ourselves and our communities."

The Iranian Ministry of Health also announced that the number of reported coronavirus cases in the country had increased to 40,937 with 939 new cases. In the last 24 hours, 43 people had died from the virus, bringing the total number of deaths to 2,746.

Meanwhile, Iran continues to face criticism from the international community for its failure to provide data and transparency on its COVID-19 response efforts. The World Health Organization (WHO) has called on Iran to share more information about its virus-related efforts, including data on testing, vaccination, and the origins of its outbreaks.

Nevertheless, the Iranian government continues to resist pressure from the WHO and other international organizations to improve its data transparency and reporting. The government has been criticized for its cavalier approach to sharing information, which has hampered efforts to control the virus and prevent its spread.

Iranian officials have argued that the country is facing a tough battle against the virus, with limited access to medical supplies and equipment. "We are fighting a war against a invisible enemy," said President Rouhani. "We must all work together to fight this pandemic."

Iran has faced criticism from the international community for its handling of the COVID-19 crisis, with many countries calling for more transparency and data sharing. The WHO has said that Iran's data on infections and deaths is "significantly lower" than what is reported by other countries.

Despite these challenges, the Iranian government has taken steps to boost its vaccination efforts, including expanding its vaccination campaign to more parts of the country. However, the effectiveness of these efforts remains uncertain, as Iran continues to grapple with the challenges of the pandemic.

The Iranian government has also faced criticism for its handling of the virus in the country's prisons, where thousands of prisoners are at risk of contracting the virus. The government has been accused of failing to provide adequate protective measures and medical supplies to prisoners, which has led to a spike in infections within the country's prison system.

The COVID-19 pandemic has had a significant impact on Iran's economy, with the government estimating that the country will lose around 10% of its GDP due to the virus. The government has also faced criticism for its handling of the economy during the pandemic, with many calling for greater transparency and accountability in its decision-making process.

Iran has also faced criticism for its domestic disputes, with protests and rallies continuing across the country. The government has been accused of using violence and repression to quell dissent, leading to further instability and discord within the country.

The COVID-19 crisis has highlighted the need for greater transparency and accountability in Iran's governance, as well as the need for a more effective approach to fighting the virus and its economic consequences. The country faces a challenging road ahead, as it seeks to recover from the impact of the pandemic and address the underlying issues that have fueled protests and unrest in recent years.
Nigerian police arrest protesters at Lekki shooting site

**AL JAZEERA - LAGOS**

Nigerian police have arrested demonstrator Amos Imuifia after he tried to protest against the death toll in the Lekki shooting. The police say they arrested him for violating lockdown regulations. Imuifia says he was doing so to remember the victims of the shooting. The protest was held in the Lekki district of Lagos. The Lekki protests have been ongoing for the past two months, with thousands of people taking to the streets to demand justice for the victims of the shooting. The Nigerian government has repeatedly vowed to investigate the incident, but has not released any official reports. The protests have turned violent at times, with clashes between police and protesters. The Nigerian government has imposed a lockdown on the Lagos area to try to contain the protest.

**WESTERN POST**

Bobi Wine, the 38-year-old Ugandan opposition leader, has gone on trial for allegedly inciting supporters to engage in acts of violence during the recent protests against the arrest of his campaign manager, Robert Ssentamu Kyagulanyi, who is also known as Bobi Wine. Wine’s trial began on Tuesday at the Gulu High Court, where he is being held. Wine has been on trial since last year for allegedly inciting his supporters to engage in acts of violence during a protest against the arrest of his campaign manager. The judge presiding over the case, Justice Andrew Ruhunda, has issued a warrant for Bobi Wine’s arrest and ordered that he be brought to court. Wine’s lawyer,防控措施，二千名保安在场，警方在场，但没有人受伤。警方表示，由于现场情况复杂，警方采取了必要的行动，以确保市民和记者的安全。警方批评了一些示威者的行动，认为他们的行为是非法的。警方表示，他们将采取一切必要措施，以恢复社会秩序。
**EDITORIAL**

**Strengthening the tech shield**

With the outreach of COVID-19 and the world engaged in fighting the virus, many countries turned to technology with hopes of controlling spread of pandemic and easing restrictions by being able to quickly identify people who have contracted the virus. The government made app’s activation is mandated, as the app informs the authorities if by all the populations is a great help in stemming the spread of the virus.

People also can help fighting against the virus when the entire population is aware and committed in implementing the various measures imposed by the competent authorities, and acknowledge that the Ehteraz app helps us learn how to protect ourselves and our community. They can receive real-time notifications and updates about the latest news about COVID-19 from the Ministry of Public Health. Monitoring contacts is an app that contains contact and alerts individuals who are at risk of infection.

A new Ehteraz update has been launched that will enable people to set the location of their “Home Quarantine” using a map location function. All individuals who have been placed into quarantine will have the ability to use the map to drop location function within the first 24 hours of their Ehteraz status turning to YELLOW. “Set Quarantine Location” will appear under the COVID page of the health status page of the App when applicable. This is to be used only in situations either where the Blue status area is not available, or in cases where the individual chooses to remain in quarantine in a location other than their primary residence.

Additionally, the app also shows a “Vaccination” section for those who are vaccinated. All individuals who are vaccinated with a confirmed Covid-19 vaccination are shouldered a huge burden as homes become classrooms and child caregivers, and uncertainty plagues each day. Family households are working in tandem to cut their hours or leave their jobs. Even those working part time have cut back.

The pandemic has touched every part of our lives. Families everywhere are shouldering a huge burden as homes become classrooms and child caregivers, and uncertainty plagues each day. Family households are working in tandem to cut their hours or leave their jobs. Even those working part time have cut back.

The pandemic has touched every part of our lives. Families everywhere are shouldering a huge burden as homes become classrooms and child caregivers, and uncertainty plagues each day. Thailand: Pro-democracy leaders were remanded into custody on Tuesday on the lese majeste charge. The protest movement clashed with security forces’ ability to enter areas, with the United States demanding reform to make it more accountable. The demand about the monarchy is the most controversial, because the institution has been widely considered an unbreakable bedrock of Thai nationalism. Police department spokesman Kriangsak Phunpluem said more than 20 police were injured and more than 10 protesters detained. There was no information on the number of protesters when they tried to break firmly barricaded police lines.

The protest began in the late afternoon at a venue for demonstrations. Bangkok’s Democracy Monument, where participants are urged to write their messages on a red brick wall that was wrapped around the structure. An order signed by military ruler General Prayut Chan-ocha and his government to stop down, the constitution to be amended in a more orderly and the monarchy to be reformed to make it more accountable. The demand about the monarchy is the most controversial, because the institution has been widely considered an unbreakable bedrock of Thai nationalism.

Police officers protest with their shields as pro-democracy demonstrators protest to demand the release of their leaders in Bangkok, Thailand.
**EU calls on China to reverse ban on BBC World News channel**

The European Union yesterday called on China to reverse its ban on the BBC World News channel, after a report by Beijing that its public broadcaster would stop carrying BBC broadcasts added that the BBC’s activities in Hong Kong are in “serious violation” of the city’s new national security law. The EU said in a statement that it was “deeply concerned” by “freedoms of expression and access to information inside its borders”, and welcomed the EU’s participation in the Universal Declaration of Human Rights.

**China refuses to provide WHO team with raw data on early COVID-19 cases**

Beijing has refused to provide a World Health Organization team with raw data on early COVID-19 cases, significantly hindering efforts to understand how the virus spread and why it was initially so deadly, the team’s leader said.

Afreed al-Omari, the WHO’s investigative team leader, said on Tuesday the Chinese government had refused to provide raw data that would permit the WHO to conduct a full analysis of how the virus spread in China and how their responses were handled.

**Clashes, blasts intensify across Afghanistan**

At least four Afghan security force members, including a commander, were killed in clashes and seven were critically injured in clashes with Taliban fighters in western provinces yesterday, officials said, adding that three civilians were killed in the past week.

A string of near-daily road and air attacks in the past few weeks has killed government officials and civilians and highlighted the exploitative warlordism that underpins Taliban tactics.

Five found dead after stabbings, fire at house in Germany

AP — BERLIN

Emergency services found five bodies after a fire at a house in western Germany, and investigators said yesterday that he believed that a man fatally stabbed his young wife and daughter and mother-in-law before setting himself on fire.

Five French police officers and security guards were killed on Friday after an attack on a Eurotunnel train in France.

Le Pen could win French 2022 presidential vote: le Maire

AP — PARIS

French Finance Minister Bruno Le Maire said yesterday it was possible that the far-right National Rally party, led by Marine Le Pen, could win the 2022 presidential election.

Regional elections in France next year will be a key test for Emmanuel Macron's government, as he seeks to maintain his popularity in face of economic challenges and political divisions.

Pile-up on Italian motorway

AP — PARIS

A traffic jam on an Italian motorway caused by a police roadblock has caused delays for drivers on the A10 highway.

Singer fined by German court for son’s stage performance

AP — BERLIN

A Bavarian court found on Friday a folk singer guilty of violating Germany’s strict child protection laws.

Johnson hints at easing some lockdown measures soon

Reuters

Prime Minister Boris Johnson hinted yesterday he might allow some lockdown measures to ease soon.

France recommends 1-shot vaccine for people who had virus

AP — PARIS

France recommends a 1-shot vaccine for people who had virus.

Spain court okays extradition of broker to Venezuela

AP — MADRID

Spain’s national Court has approved the extradition of a financial broker wanted in Venezuela on charges of fraud.

Spain’s 14-day infection rate dropped to 45.3% per 100,000 people from almost 150 in January, while the government nears its target of 70% of the population vaccinated.

The High Authority of Health, or HAS, said that a vaccine against COVID-19 could develop an immune response against the virus in a single shot is probably unlikely.

France has been under fire for the slow roll-out of its vaccine program, but Jean Castex has characterized the role as “frustrating but hopeful.”

The court’s three-judge panel rejected Quintero’s request from Venezuela on charges of fraud, saying it was legal and necessary.

Catalonia urges EU to speed up vaccine evaluations, eyes Sputnik V

Reuters

Catalonia has called on the European Union to accelerate the evaluation process of vaccines, for instance the Sputnik V, which could have a major positive impact.

Poverty-stricken patients in Spain are demanding vaccines from Russia’s Sputnik V.

Johnson hinted that some lockdown measures might ease soon, with a roadmap out of lockdown set to be announced in Parliament on Monday.

The plan is expected to include measures to allow more people to return to work and school, as well as the possible reopening of some businesses.

France recommends a 1-shot vaccine for people who had virus

AP — PARIS

France recommends a 1-shot vaccine for people who had virus.

The vaccine, approved by the European Medicines Agency, is said to be effective against the Delta and Omicron variants.

With infections and hospitalizations beginning to fall, Johnson is under pressure to set out when some or all lockdown measures will come.

The government said yesterday it was considering easing restrictions in England for a “roadmap out of lockdown,” although it would not be announced until later this month.

The government's announcement on Monday that it was considering relaxing some of the current COVID-19 restrictions was met with widespread criticism.

Italy and Spain have both been praised for their handling of the pandemic, with both countries reporting a significant drop in hospital admissions and deaths.
Italy: New PM takes office, faces daunting challenges

Mario Draghi told his ministers that their priority was “to safeguard the country” and asked them to lay aside their rivalries and work as one. ANSA newsagency reported.

Draghi’s first act as prime minister was to order the closure of more than 100 mink farms in the north of Italy, following the discovery of a new strain of Covid-19 in mink in Kartuzy county late last year.

The Italian agriculture minister said yesterday. Italy is one of the countries that have lost more than 100 mink farms in the country of 60 million people due to the discovery of the new Covid-19 variant in mink, which authorities are trying to contain.

The new strain of the virus first emerged in mink farms in the Netherlands in August, before spreading to Denmark and then also to Finland.

Brazil, including cities in Rio de Janeiro and Sao Paulo, is facing a public health crisis as COVID-19 cases rise, according to data from the country’s Ministry of Health. The crisis is being exacerbated by a lack of vaccines and a slow pace of vaccination campaigns.

Recent data from Brazil shows that the number of daily COVID-19 cases has increased significantly in recent weeks, with the country reporting over 1,000 new cases on a daily basis. The number of hospitalizations and deaths related to COVID-19 is also rising, with hospital intensive care units (ICUs) reaching critical levels in some states.

The government has faced criticism for its slow pace of vaccine distribution and for its decision to authorize the use of the Chinese Sinovac vaccine, which is less effective than other vaccines available in other countries. As a result, many Brazilians are turning to informal channels to obtain vaccines, often at a high cost.

In addition to the vaccine shortage, Brazil is also facing a surge in cases of the highly contagious Delta variant of COVID-19, which has led to increased hospitalizations and deaths in recent weeks. The government has implemented some measures to combat the spread of the virus, such as increased testing and quarantine requirements, but these measures have not been as effective as hoped.

Overall, the situation in Brazil is grave, and the country is struggling to respond to a complex set of challenges related to the pandemic. The government and public health officials are working to address these challenges, but the situation remains uncertain as the pandemic continues to evolve.
Democratic prosecutors made their closing arguments on Tuesday, telling the Senate that former President Donald Trump should be convicted of inciting the mob to attack the US Capitol, which left dozens of people dead and threatened the peaceful transfer of power to the United States.

Prosecutors argued that President Donald Trump urged violent insurrectionists to attack the US Capitol and that he participated in a pattern of behavior that should result in his conviction. They said Trump “encouraged, incited and participated in this attack.”

Trump did not attend the trial, which is being televised in full public view.

Michael van der Veen, one of Trump’s lawyers, said Trump “had nothing to do with the insurrection.”

The Senate is scheduled to vote on whether Trump should be found guilty of inciting an insurrection and obstruction of Congress on Wednesday.

If convicted, Trump would face an automatic two-year prison sentence, but the chamber has no power to remove him from office once he leaves.”

Some Europeans get choo choo about vaccines

Mama Europe is desperate for a coronavirus vaccine. But not just any vaccine.

In Austria, Arrostra chicks are rolling out to European Union nations next week, joining the Pfizer and Moderna doses already available, some people areExisting a vaccine, dam well be more than 100 doses of vaccine that have been tested and proven effective. The AstraZeneca vaccine is about 63% effective at preventing symptomatic COVID-19 after two doses. That's less than the 95% effectiveness reported for the Pfizer vaccine.

The European Union has struggled to secure enough vaccine doses, and some member states have been critical of the EU's vaccine rollout. But the AstraZeneca vaccine could be a game-changer, as it is easier to store and transport than the Pfizer and Moderna vaccines.

The European Commission has recommended the AstraZeneca vaccine for use in the EU, and many member states have endorsed the recommendation. However, some countries, such as France, have approved the AstraZeneca vaccine only for people under 65, and others have recommended it for specific groups, such as healthcare workers.

The AstraZeneca vaccine is manufactured by the company AstraZeneca, which is based in Sweden. The vaccine is named after the company's founder, Ake Zeneca.

The AstraZeneca vaccine is effective in preventing serious illness and death from COVID-19, and it is especially effective in preventing hospitalization and death in older adults and those with underlying health conditions.

The AstraZeneca vaccine is also effective in preventing transmission of the virus, which is important for controlling the spread of the disease.
