The Ministry of Education and Higher Education (MOE) has announced a request for submitting Expressions of Interest (EOI) in public-private partnership (PPP) development of Qatar schools’ trackpack 31 which consists 14 schools.

The package 3 consists of four secondary schools, five preparatory schools, four primary schools, and a school for students with special needs.

This step is aimed at meeting the increasing demand in the education sector, continuing with the population growth and the increasing number of students enrolled in schools, while achieving continuous improvement in the quality of education.

The project scope includes the design and construction works in fourteen schools, project financing operation and maintenance for a 25-year concession period.

Qatar contributes to global efforts to address COVID-19 pandemic

The State of Qatar has contributed to the global efforts to fight the COVID-19 pandemic. In January 2021, the State of Qatar announced its commitment to support the COVAX initiative and contribute to the global vaccination effort.

Qatar's contribution to the COVAX initiative was to purchase and donate COVID-19 vaccines to other countries that may not have the capacity to procure vaccines on their own. This effort was aimed at ensuring equitable access to COVID-19 vaccines worldwide.

Qatar’s contribution to COVAX was made through the COVAX mechanism, which was established by the World Health Organization (WHO) to help countries that cannot afford to buy vaccines on their own. COVAX aims to provide vaccines to all countries, regardless of income level, and ensure that the global COVID-19 vaccination campaign is successful.

Qatar’s contribution to COVAX was a testament to the country’s commitment to international cooperation and the fight against the pandemic. It demonstrated the State of Qatar’s role as a global leader in the fight against the COVID-19 pandemic and its commitment to contributing to the global effort to overcome the pandemic.

Qatar’s contribution to COVAX was part of a broader initiative to prevent and control the spread of COVID-19. The country has taken several steps to combat the pandemic, including the implementation of strict quarantine measures, the distribution of face masks, and the promotion of social distancing.

Qatar’s contribution to COVAX was a significant step in the fight against the pandemic and demonstrated the country’s commitment to global cooperation and the fight against the COVID-19 pandemic. It showed that Qatar was willing to contribute to the global effort to overcome the pandemic and ensure that all countries have access to vaccines.
Deputy PM meets GCC Secretary-General

Deputy Prime Minister and Minister of Foreign Affairs H E Sheikh Mohamed bin Abdulrahman Al Thani met yesterday with Secretary-General of the Cooperation Council for the Arab States of the Gulf Dr. Thani bin Thani in Doha, who is currently visiting the country. QA processes 50,000 hotel quarantine refunds

The Ministry of Public Health has processed a total of 50,000 hotel quarantine refunds for workers and residents. The process was initiated in February to address complaints from workers who had to undergo quarantine due to COVID-19 restrictions. The refunds, amounting to QR 50,000,000, were issued after the expiration of the hotel quarantine period and the completion of the necessary procedures. The refunds were processed through the Qatar Airways Metrash2 application, which was launched to facilitate the process. The Ministry of Public Health has been working closely with the Ministry of Finance to ensure a smooth and efficient refund process.

Qatar, UAE hold first talks after Al-Ula Declaration

Official delegations from the UAE and the Qatari sides held their first meeting in Doha on March 9 to discuss the implementation of the Al-Ula Declaration and other areas of cooperation. The meeting was attended by the Assistant Foreign Minister of the UAE, Dr. Mutlaq bin Majed Al-Shibani, and the Assistant Foreign Minister of Qatar, H.E. Makhdoom Shah Mehmood Qureshi. The two sides discussed a range of topics, including the establishment of a joint committee to oversee the implementation of the Al-Ula Declaration. The meeting concluded with the commitment to continue diplomatic efforts to promote regional stability and security.

Pakistan FM, Interior Minister & COAS meet Qatar FM’s special envoy for mediation

Pakistan Foreign Minister Shah Mahmood Qureshi and Interior Minister Khawaja Asif met with the special envoy of Qatar, H.E. Dr. Mutlaq bin Majed Al-Shibani, in Islamabad to discuss the mediation process in the Karbala crisis. The Pakistan delegation expressed appreciation for the mediator’s efforts and stressed the importance of peaceful resolution. Both sides agreed on the need for continued dialogue and cooperation to achieve a lasting solution to the conflict.

Qatar contributes global efforts to address COVID-19 pandemic

Qatar has contributed significantly to global efforts to combat the COVID-19 pandemic. The country has provided financial assistance and medical aid to countries in need, including the United States, Italy, Spain, India, and many others. Qatar has also donated medical equipment and supplies to hospitals and health facilities around the world. The country’s efforts have been recognized by international organizations and governments, who have praised Qatar’s role in supporting global health efforts.

Shura Council makes recommendations on job change, exit of workers

The Shura Council has recommended legislation to improve the process of job change and exit of workers in Qatar. The recommendations include setting up an appropriate mechanism for the workers to change their job without the consent of their employer. The council also recommended making the process more transparent and fair to ensure the workers’ rights are protected. The recommendations were made in response to complaints from workers regarding unfair job changes and exit procedures.

MoCi invites applications for development of 14 schools

The Ministry of Education and Higher Education has launched a tender for the development of 14 schools in Qatar. The tender is open to companies with experience in the construction sector, and interested parties can submit their applications until March 24, 2021. The successful bidder will be responsible for the design, construction, and operation of the schools. The tender is part of the government’s efforts to improve the quality of education in Qatar and meet the growing demand for school places.

Moph: 463 new cases and 495 more recover

The Ministry of Public Health reported 463 new COVID-19 cases and 495 recoveries on March 10. Among the new cases, 38 are travellers, while the rest were residents. The total number of active cases in Qatar is now 9,917. The Ministry also reported 23 new recoveries, bringing the total number of recoveries to 93,151. The current positivity rate is 0.46%. The Ministry has been consistently working to control the spread of the virus and ensure the safety of the residents.
QU colleges hold conference on online teaching and learning

The conference offers round-the-clock services and education sector support research. We work with all participants to achieve our common educational goals, which will serve Al Mearad, and pensers for light vehicles, area of 15400 square meters. As part of Woqod’s ongoing station in Al Mearad, Woqod opens new petrol station in Al Mearad.

LPG cylinders 'Shafaf', in Woqod, customers with access to best-quality petroleum products and its neighborhood. Woqod opens new petrol station in Al Mearad. As part of Woqod’s ongoing network in the country, Woqod aspires to expand its petrol station network in the country.

“Shafaf” LPG cylinders will be available in the neighborhood to residents, and includes Latina Steel, LPG cylinders ‘Shafaf’, in addition to safe of gas line, and diesel products for light vehicles, Woqod has been pleased to open a new petrol station in Al Mearad. Woqod aspires to expand its petrol station network in the country and to meet the rising demand for fuel products, and achieve the goal of providing support with access to fuel to-class products and services, at their convenience and comfort. Q is a team that would extend its gratitude to governmental and private entities that contributed to the completion of this project.

Ooredoo launches 4th Mini Shop on Wheels

Ooredoo has expanded its Shop on Wheels fleet with the addition of its fourth Shop on Wheels. Designed to ensure the telecom-communications operator can reach as many people as possible, the Mini Shop on Wheels will offer all customers, regular Ooredoo services normally available in Ooredoo’s stores, without them needing to leave their homes.

The fourth Mini Shop on Wheels joins the other three of these Shop on Wheels, which are already serving customers around Doha, with plans in the pipeline to expand the fleet further in the coming months. The new Shop on Wheels will also allow customers at outdoor events organized under Ooredoo’s umbrella to access Ooredoo services. Ooredoo’s Director PR at Ooredoo, Naba’ Al Kuwari, said: “Our fleet of Mini Shops on Wheels has been so successful that we can reach as many of our customers as possible. It is easy for them to access our services without leaving their homes.”

“We recognize everyone is always on the move, especially in more remote areas. With our commitment to complete customer satisfaction, we want to make sure we’re available via as many means as possible to meet our customers’ needs.”

Loyola International School celebrates International Mother Language Day

International Mother Language Day was celebrated in Loyola International School on Thursday. The event also helped in the promotion of linguistic awareness and cultural diversity that exists in the world.

The registration for free education under quota of Russian government is extended. The registration of candidates for free education under the quota of the Russian Federation is extended until March 15, 2021. Croatian citizens, stateless persons and Russian compatri- tors with permanent residence in Russia, are eligible to participate. The selection process is conducted in a way that the candidates are interviewed, and their learning outcomes. The conference supports the United Nations’ Agenda 2030, for Sustainable Development Goals (SDGs), which will be dis- cussed across various professional fields, including the educa- tion sector, and actively con- tribute to its mandate. It is in- due for the quiescent EEIC 2021 will focus on bringing technology and educators together.

Prasad and Vice President Minico P.K. Vyas of Loyola International School expressed their gratitude to all entities that contributed to this project. They are very proud to sponsor this con- ference and high-quality proceedings of the conference and international experts, edu- cators, researchers. We wish all participants to achieve our common educational goals, which will serve Al Mearad, and pensers for light vehicles, area of 15400 square meters. Dr. Ertifaa Al Shammari

### Breast cancer patient discharged on same day after surgery

A team of breast surgical oncologists at Hamad General Hospital (HGH) has successfully performed a same day surgery for a patient in her forties, with the patient being discharged from the hospital on the same day of surgery.

This is the first time in Qatar in a same day discharge surgery, was performed for this kind of case.

The surgery has been carried out at the Ambulatory Care Center (HMC’s Ambulatory Care Center) and will bring excellent results for the patient, and the region.

### Dr. Al Shammari comment:

Dr. Al Shammari said that performing a same day surgery for breast tumor removal under the supervision of a highly experienced medical achievement for the hospital and the region. The patient was diagnosed with an early stage breast cancer and following her diagnosis and the development of an appropriate anaesthesia plan, a decision was made to remove the tumour surgically on the same day of surgery.

The surgery lasted for three hours and the patient remained under medical supervision for a few more hours before being discharged from the hospital.

The patient expressed her gratitude to HMC and thanked her healthcare team for the high-quality care she received during all stages of her surgery.

“The patient expressed full confidence in our surgical team and the region’s healthcare system across the project provides real-time data on energy consumption from various locations.

This data is useful in identifying and fixing any unusual consumption patterns resulting from faulty appliances or misuse. Other sustainable features of the development include the use of sustainable and locally sourced building materials, a robust system of treated water for irrigation purposes, native plants for landscaping, and reuse of recycled water provided by the Integrated Building Management System (IBMS) to keep a tab on energy and water consumption.

The Integrated Building Management System (IBMS) that meets mechanical and electrical systems of the facilities to achieve the required performance based green building certification like GSAS.

While a GSAS Districts Certification represents Lekhwiya Camp’s overall sustainability assessment purposes, native plants for landscaping, and reuse of recycled water provided by the Integrated Building Management System (IBMS) to keep a tab on energy and water consumption.

The GSAS-Design & Building (D&B) certification provides recommendations under different schemes based on their building typologies. These include GSAS Hospital to assess the healthcare buildings, GSAS-Commercial to assess headquarters and other administrative and mixed-use facilities, GSAS-Industries to assess the industrial and logistics facilities, GSAS-Transport to assess the transport facilities, and GSAS-Sports to assess headquarters and other administrative and mixed-use facilities, GSAS-Industries to assess the Khamenei: Iran may enrich uranium to 60% purity if needed

Supreme Leader Ayatollah Ali Khamenei said yesterday Iran might enrich uranium to 60% purity if the country needed it and would never yield to US pressure over its nuclear activity, state television reported.

Iran's 2012 nuclear deal with the powers, which it has been brushing aside since the United States withdrew in 2018, caps the fissile purity to which it can enrich uranium to 20%, under the 2018 accord, 60% is considered non-proliferation safe for a nuclear reactor.

Iran's uranium enrichment level will not be limited to 20%. We will increase it if the country needs it, Khamenei said, citing the argument in the amid the stand-in for the head of the bargaining front during the nuclear negotiations.

Khamenei said processed uranium, a source of wealth, but warned against the initiation of any negotiations on this with the US. America, the US and the European countries, is currently trying to destroy the agreements, he said. The US is currently trying to destroy the agreements, he said.

In the expansion digital advertising market, the adverse effects of an oligopoly by tech giants have become conspicuous. The government must put efforts into their own reforms. should put efforts into their own reforms. internet, tech companies to lose significant advertising revenue, making it difficult to know the situation, making such comments “delusional.”

The report proposes that tech companies need to make every effort to help people gain an understanding of data privacy and how to use their personal data to make it easier to understand. They must also strive to create friendly systems for users to reject the use of their personal data.

The more times a website is visited, the better reputation it gets, generating more advertising revenue for tech companies and increasing the chances that their ads will be displayed on a user’s screen.

Tech companies need to make every effort to help users understand how they deal with such matters. It is hoped the law will be effective in protecting users and business partners in the field of digital advertising.

The domestic digital advertising market should still be looked over five years to reach about 210 billion ($58bn) in 2023 and it has become a source of revenue for tech giants. Google accounts for about 80 percent of search engine market share, and its competitors are reportedly frustrated by the inordinate influence of such compliants as “We have no knowledge that they have read the terms of service.”

In virtual form. The opposition submitted to reach Gaddaﬁ from power. It holds that the whole alliance fell apart as the various groups have different agendas and mistrust each other for political interests. The post- Gaddafi era led to terrorism, unintended consequences, creating regional unrest, massive civilian displacement, and an uncertain and conducive to terrorism and extremism.

After 42 years of autocratic rule, the current regime has-transformed into a post-revolutionary state and an efficient security apparatus, which has had a negative impact on the post-revolutionary process setting up domestic political institutions and stabilizing the state.

The country has struggled to build a democratic system and a consensus over the state's future. The current administration has provided a new system in Libya to build solutions to the achievement of a substantial political settlement within the country. The disagreement as to what political system is to be adopted means that the country has been along its way of realizing the situation for over ten years. Libya's political trajectory has gone through different stages since 2011. But, in 2014, Khalifa Haftar, a former military officer, made the decision to return to Libya following the outbreak of the protests in the country. He declared a coupe d'etat against the government and set his sights on Tripoli, triggering a counter-assault and effectively split the country into two halves. Since then he has been trying to recover from the conflict setting. In the current critical moment for Libya during August 2020, and the collapse of a peaceful transition and the partitioning of Libya, which were crazy dominating decisions.

With the help of some of his well-off allies, Haftar extended his military presence and claimed authority. Given the country of which has been involved in the Libyan conflict, the security situation in the country has become more complex and economic and political challenges. Haftar's job is the result of Libya failed to cooperate and helping Libya people to build a national consensus over the post-Gaddafi era.

Frederic Wehrey, a senior fellow in the Middle East Program at the Brookings Institution for International Peace and Security, said that Haftar's political ambitions and the UN-backed GNA were far from being isolated in supporting the east and the west of the country.

In order to provide a reliable election, international actors must coordinate their approach to support the UN efforts, engaging with Libyans across the country in a way that enhances the country's unity and sovereignty.

People wore Libyan flags as they gather during celebrations commemorating the 10th anniversary of the 2011 revolution in Tripoli, Libya.
A general strike against army rule ended in Yangon yesterday and huge crowds cheered and danced in streets despite fears of violence after a day of confrontations that left many casualties.

The country’s security forces have killed at least 10 people in what have been the bloodiest confrontations since the military seized power this month. At least 700 people have been arrested in recent days, and officials have warned that the police were ready to use live ammunition.

In the main city of Yangon, buses were stopped at roadblocks, and police fired tear gas to disperse people who were gathering in a central square.

In the southern town of Dawei, police used tear gas and rubber bullets to break up a protest by thousands of people who had gathered to demand the release of elected leaders and the restoration of civilian rule.

The army’s decision to allow the protest, which was largely peaceful, was seen as a sign that the military was preparing to confront the growing anti-coup movement.

But the military has also warned that it would use force to quell any demonstrations that it considers illegal.

A rights group said that as late as Sunday, 490 people had been arrested in connection with the protests.

Thailand imposes curbs as virus cases spike

India imposes curbs as virus cases spike

India imposed a series of new restrictions on Monday to try to contain a rising wave of infections that has been driven by a highly contagious variant of the virus.

The state of Maharashtra, which is home to Mumbai, reported 1,729 new cases on Monday, bringing the state’s total to 16,371. The city of Pune, which is also seeing a surge in cases, reported 751 new infections.

India’s health minister, Dr. Harsh Vardhan, said in a virtual address on Sunday that the government was taking “unprecedented steps” to control the outbreak.

But experts have warned that the country’s large population and the fact that the virus is spreading rapidly in some areas could make it difficult to contain.

UN refugee agency calls for rescue of Rohingya adrift on boat

UNHCR —

Idolpe's President, John Wibawa, called yesterday for the world’s humanitarian authorities to prepare for a large-scale rescue of a group of Rohingya refugees who are said to have been adrift for nearly a week in the Andaman Sea where they are said to be without food or water.

The Center for Covid-19 Situational Awareness, a non-governmental organization, found that the virus was spreading rapidly in some parts of the country, including Maharashtra, where the government has imposed strict lockdowns.

Late last month, Vietnam announced plans to begin a national vaccination program next month with 30 million doses, including 30 million under the COVAX scheme.

But experts have warned that the virus is spreading rapidly in some areas, and that the government needs to take more drastic measures to control the outbreak.

The country of 98 million people has reported more than 2,840 deaths due to the virus.

The Southeast Asian country, which has reported 117,000 infections, had been a leader in the region in containing the virus, but has seen a rise in cases in recent weeks.

At least 100 people have died in the last two weeks, and a fresh outbreak of the virus in some parts of the country has raised concerns.

In the capital, Naypyitaw, businesses in the southern tip of the country have been closed in some provinces.

But experts have warned that the government needs to take more drastic measures to control the outbreak.

New Zealand lowered its flag yesterday and made special note of the people who couldn’t travel as it marked the 10th anniversary of the earthquake that killed 185 people.

**AP — WLINGTON**

New Zealand’s Prime Minister Jacinda Ardern yesterday said the quake had killed 185 people and injured 1,150.

**AP — ADELAIDE**

Thousands of evacuees in West Java have experienced flooding since Saturday because of heavy rains. Some embankments are broken, not only from the river embankment but also from the terracing embankments,” Public Works and Housing Minis- ter Basuki Badruddin said yesterday.

Rescuers from the National Disaster Management Agency, said that more than 28,000 residents in four villages in Bekasi district and 34 villages in Karawang district are affected by the floods. At least 4,000 people are feared dead, she said.

Thousands of houses in the area are covered with 150 to 250 centimeters of water and are without power.

Seasonal rains and high tides have caused damages to dozens of embankments and wide- spread flooding across much of Indonesia, a chain of 17,000 islands whose millions of people live in mountainous areas or near fertile flood plains close to rivers.

“Some of the residents are living in disaster-prone areas,” said Rescuers from the National Disaster Management Agency, said that more than 28,000 residents in four villages in Bekasi district and 34 villages in Karawang district are affected by the floods.

UK planning revaccination campaign later this year

BERLIN — Britain is preparing for a revaccination programme against the coronavirus, a move the government said in plan to go ahead as early as this autumn.

“The Government is planning a national revaccination campaign, which is likely to be the largest in Europe this winter,” the document said.

“Any revaccination is likely to be a single dose.”

7.5m Brits have been infected, giving the UK one of the highest infection rates in the world.

Scotland's health minister, used as a test case for governments around the world to consider how to protect health systems as the pandemic is expected to continue for years to come.

The European Commission has announced plans to present a proposal for a third COVID-19 vaccine dose, which will be discussed during a meeting on March 11.

The proposal aims to build on the success of previous EU vaccine campaigns to ensure that the continent is well prepared for future pandemics.

Under the plan, the EU would provide funding for vaccine production capacity in the EU, while also ensuring that vaccines are produced within the region. The proposal will also include measures to facilitate the movement of vaccines within the EU.

The European Commission has also announced plans to increase the number of vaccine doses available for the entire world, with a goal of ensuring that 20% of the world's population is vaccinated by the end of 2021.
Vaccination drive in Russia picking up speed

**AP - MOSCOW**

European Union foreign ministers agreed yesterday to prepare measures to blacklist Russian officials close to President Vladimir Putin, in response to Moscow's明明 markedly symptomatic response to the assassination of Alexei Navalny, three EU diplomats said.

The political agreement, which is expected to be formally approved by the EU in March, came after France, Germany and the Baltic states urged the 27-member bloc to send a message to Putin that actions must be taken to allow Navalny to be allowed in Russia.

Navalny, 44, was arrested upon returning to Moscow last month from Germany, where he had been recovering from a near-fatal poisoning inflicted in Russia last year. What evidence said Navalny wrote said that spiking his stoked international outrage over the arrest.

No names were discussed at Monday's meeting, but one diplomat said the proposed new travel curbs would target, among others, Alexander Bastrykin, the head of Russia's Investigative Committee handles investigations, and Leonid Volkov, a senior aide to Putin, the Kremlin extended both invitations seen as giving Putin a chance to showcase his diplomacy.

But Volkov welcomed the diplomatic overture, saying: "I am very happy that we have been able to keep our message to Putin, who today is being very clear about his intentions."

Volkov has also chargedQueryBuilder uncertain of the timeline for setting aside some stock for second shots. Moreover, some regions have already admitted that they will not be able to vaccinate all of their residents by the end of the year due to a lack of supplies.

According to the Russian coronavirus tracking system, as of February 23, 2021, over 2.2 million Russians had received first dose of the vaccine, while over 1 million had received the second shot.

However, the vaccination drive has been met with some resistance due to the high cost of the vaccine and concerns over its safety and effectiveness. Many Russians have been hesitant to receive the vaccine, leading to a slow start of the vaccination campaign.

The Russian Ministry of Health and the Federal Pharmaceutical Agency have been working to increase vaccine availability and improve vaccination rates. They have also been collaborating with regional authorities to ensure that the vaccine is administered in a timely and effective manner.

In conclusion, while the vaccination drive in Russia has shown some progress, there is still a need for increased awareness and education efforts to encourage more people to get vaccinated. It is crucial that the government continues to work closely with regional authorities to ensure a successful vaccination campaign.

The head of the San Francisco school board has put in hold controversial plans to rename some schools until students are back on campus after months of virtual learning during the coronavirus pandemic.

The board of Education Pres- ident Gabriela Lopez made the decision in Monday’s edition of the San Francisco Chronicle and on SFChronicle.com on Thursday, the newspaper reported.

“Since have been many dis- cussions public debates we’ve been working to reopen our schools,” Lopez wrote. “School renaming has been of one of our top priorities this past year with a timeline that didn’t anticipate a pandemic and I acknowledge and take responsibility that mistakes were made in the renaming process.”

The board’s vote “will allow us to start the process of renaming our district schools, aligned with the district’s values and goals,” Lopez said in the statement.

In November 2018, the San Francisco school board had put in hold controversial plans to rename some schools until students are back on campus after months of virtual learning during the coronavirus pandemic.

Design experts underline importance of innovation in creative industry

M7 signs agreements with DHL, VCUarts Qatar & INJAZ Qatar

The 16th edition of the flagship UEFA Champions League will see the 24-team tournament celebrated across 12 host cities, including Amsterdam, Bilbao, Dublin, Bucharest, Budapest, Copenhagen, Dublin, Glasgow, London, Manchester, Rome and St. Petersburg.

Afzal Ahmad Al Obaidly, Acting Head of Public Programs at Msheireb Cultural Forum (M7), and Anis Bengiuma, Design Director at The Creative Union.

"We at INJAZ Qatar are very proud of this partnership with M7. We share a common mission to develop the careers of the youth of Qatar, train aspiring entrepreneurs in creative fields and spark entrepreneurship among them. This collaboration will provide our students with the added benefit of being exposed to the global standards of creativity and design thinking," said Al Khaja, CEO of INJAZ Qatar.

The agreement with VCUarts Qatar will see Qatari Airways work with the university to develop knowledge and advance creative industries and building communities.

"As a creative hub, M7 is committed to creating opportunities and advancing education within the industry while supporting Qatar Airways as it nurtures a thriving creative landscape," said Mr. Al Suadi, Director, M7.

"It is an honor to participate in this program. We are excited about the opportunities and hope to see positive results in the near future," said Mr. Al Obaidly.

The agreement with VCUarts Qatar will be one of many that the national carrier aims to enter into with other universities in Qatar to further cement its position as a leader in the region.

M7 was established under the Qatar Museums, the创意 bunny, which aims to be the leading cultural institution in Qatar and a world-class public institution.

The agreement with VCUarts Qatar will see Qatar Airways work with the university to develop knowledge and advance creative industries and building communities.

"As a creative hub, M7 is committed to creating opportunities and advancing education within the industry while supporting Qatar Airways as it nurtures a thriving creative landscape," said Mr. Al Suadi, Director, M7.

"It is an honor to participate in this program. We are excited about the opportunities and hope to see positive results in the near future," said Mr. Al Obaidly.
